XOwnage - July 11, 2012, 12:10 pm

Whats it coded in? Looks interesting

Oppresor - July 11, 2012, 12:11 pm

(Jul 11, 2012 12:10 PM)XOwnage Wrote: [\[CITE\]](#) Whats it coded in? Looks interesting

It's coded in VB.NET and is based off of the iKrypter Source.

FreddyEmrich - July 11, 2012, 12:15 pm

Cant start it , auto close , anyways thx for share

Oppresor - July 11, 2012, 12:21 pm

Run as admin. Working fine here.

?

FreddyEmrich - July 11, 2012, 12:24 pm

if i hadnt try this , i wouldnt write here :D

but no problem man

keep up the good work

MaxX0r - July 11, 2012, 12:24 pm

The program doesn't run in Sandbox with and without Administrator Rights. Be careful...

???LL - July 11, 2012, 12:26 pm

why you scanned with virustotal.com ?

?

MaxX0r - July 11, 2012, 12:27 pm

He scanned only the Builder with virustotal not the stub. :)

??g???l? - July 11, 2012, 12:29 pm

Sincerely no sandbox and admin right to run... !!!

Anyone can confirm its clean?

??g???l? - July 11, 2012, 12:37 pm

Oppresor - July 11, 2012, 12:44 pm

Won't work in Sandboxie due to Obfuscation.

I release Crypters everyday, Vexna confirmed this was clean, he is from the HJT Team.

MaxX0r - July 11, 2012, 12:44 pm

Can you show us proof that Vexna confirmed this?

XOwnage - July 11, 2012, 12:45 pm

Assholes think I am backdooring you guys ?

Phaisam - July 11, 2012, 12:52 pm

Confirmed it works, 5/15 thanks buddy, one problem, it doesnt let my crypted file attach to my jdb

Insight - July 11, 2012, 12:54 pm

@phaisam thats probably your jdb thats messing up don't see why any server wouldnt be attatched to a jdb.

Oppresor - July 11, 2012, 12:57 pm

(Jul 11, 2012 12:52 PM)Phaisam Wrote: [\[CITE\]](#) Confirmed it works, 5/15 thanks buddy, one problem, it doesnt let my crypted file attach to my jdb

I can't understand you sorry buddy. I am assuming english isn't your first language. This is for crypting .EXE files.

ByteCanHasHax - July 11, 2012, 3:53 pm

Sorry, I'm a noob, but what is Stub for? :(

Vexna - July 11, 2012, 3:55 pm

(Jul 11, 2012 03:53 PM)ByteCanHasHax Wrote: [\[CITE\]](#) Sorry, I'm a noob, but what is Stub for? :(The stub is actually what makes the crypter detected or not.

Relativity - July 11, 2012, 5:03 pm

Thank you so much!

Works like a charm!

Rabbit8888 - July 11, 2012, 5:18 pm

Thanks for making a good crypter that is partially UD in some AVS! (my first time RAtIng for fun with CyberGate behind a nVPN)

Dc2chicago - July 11, 2012, 6:11 pm

Thanks !! One of the only places I can seem to find a good free FUD crypter.

I'm pretty new to this, I already have RAT + vpn + binder, just need to crypt. Do I simply browse file and press enter? What do I have to do on my end? Do i crypt first >> then bind with my separate binder?

Appreciate any and all support on these most likely simple questions

Oppresor - July 11, 2012, 8:27 pm

No problem guys enjoy! I have great updates to release for the crypter soon! Stay tuned for tomorrows FUD version! Thank you for using Daily Crypter :)

And thank you for all replying to my thread to say thank you.

InvaLid UsER - July 11, 2012, 9:59 pm

Thanks for the free crypter. Just downloaded it.

Oppresor - July 11, 2012, 10:47 pm

Yoshi™ - July 11, 2012, 11:03 pm

I appreciate the direct download link.

However, you have to remember that trolls/inexperienced 12 year olds will download this and scan it on virustotal like crazy.

Oppresor - July 11, 2012, 11:27 pm

Yes, I know.

I am working on a work-around on this situation.

Well i hate and many others do too , but patch the host file for them . I think its the only possibility to keep public crypter safe in anyway.

mortalus - July 12, 2012, 10:12 am

thank you very much for the free crypter ! nice work !

Oppresor - July 12, 2012, 10:41 am

That is exactly what I plan to do, I am going to patch the hosts File.

XOwnage - July 12, 2012, 11:13 am

Sad this is the only possibility to survive at least a bit fud , due to those skids.

Oppresor - July 12, 2012, 4:14 pm

<https://hackforums.net/showthread.php?tid=2672146>

New 07-12-12 Crypter Released.

Current scan is 0/37 for files 160kb and lower as tested.

Enjoy.
