Silexx - July 12, 2012, 9:22 pm

might be a noob question.. but what is the difference between install and update?

(Jul 12, 2012 09:22 PM)Itachi-Uchiha Wrote: [\[CITE\]](#) might be a noob question.. but what is the difference between install and update?

Install = We both own the bots

Updates = you only own them.

so basically install we can potentially share with lots of peopl and update means only were getting it, does that mean that update one can be from some that already had install or are they chosen that nobody else has got them?

Exactly. Updates mean only you will have them. And to be safe you could bot kill them since they are yours, but you'd probably lose a few in the processes.

?ark Matter - July 13, 2012, 4:47 pm

thanks man this guys legit got my installs XD

Look on the forums you noob. I've been around here for ages and I've never in my life had contact with this guy. Don't shit around without looking into things.

And for some reason almost all the bots have disappeared. He definitely sent 1000 to me. I had 1100+ in total, then a few hours later it went down to 400.

U so mad?

That post and that -3 rep really makes you more suspicious, u make me think more and more that u posted a fake vouch.

By the way I didnt make a claim, I just said my opinion. So your -3 rep is invalid, as you are an uber you are expected to post HQ posts and share rep with a valid reason.

In this society I am free to share my opinions, if you do think different then accept that instead of acting like a freakin kid..

EVERYONE who reads this, check this out, business.gov is a 100% scammer:
