Thread: [\[xSyM@_ Client/Ser \]\[VB.NET 'TCP' Connexion \]\[interne Stub & Builder \]](#)

Ekin0x_ - July 12, 2012, 5:05 am

Hello , hackforums ! , i have coded a RAT/DDoser , but i Cancel the project.

Features:

- TCP connexion
- Builder, interne stub
- Choose port to listen
- IP flag
- UDP Flood
- HTTP flood
- Remote desktop
- Download & Execute File (only .exe)
- Open web page
- Chat System (Beta)
- Uninstall & Restart
- Multi threaded

Stub:

- Startup
- RegPer
- Process Persistence

Send Me a PM , and i drop the Link. ;)

Thanks !

Looks bad. No specifications of the actual programming side. Also, we in the .NET section do not approve of this retarded psot and PM shit. Another note:

You have not stated in the OP if it is a bin or a source. How bout you clarify things first. Also this is probably leached. Nothing really fascinating about it.

Vouch for this, I have seen some of his work.

BIGFATpENIS Approves!

Hei?eke? - July 12, 2012, 5:22 am

shit ton of .exe's in the source files.

Ekin0x_ - July 12, 2012, 5:26 am

ohh my goood just delete the ".icon in the source folder" :).

Khaos Theory - July 12, 2012, 7:24 am

I'm guessing this is leached because yesterday he had no idea on how to do any of the features stated, also I think I have seen the exact same features on a released source but not entirely sure.

Ekin0x_ - July 12, 2012, 7:38 am

it's not infected! it's a Source of the project not Binary files !
