Thread: [How to port forward BlackShades with BlackShades VPN](#)

aPandaification - July 12, 2012, 11:22 pm

I just got blackshades RAT and blackshades VPN but I don't know how to port forward the rat through the vpn can anyone help me out or point me to a tut. Thanks.

TheGrayAviator - July 13, 2012, 12:23 am

Have you tried enabling the ports in the VPN control panel?

aPandaification - July 13, 2012, 1:04 am

How do I get to the control panel? I don't know where to find it.

I'm pretty sure all ports are forwarded with BS VPN, just connect to it, then listen to the port, then try to check.

Murka - September 30, 2013, 6:10 am

Doesn't the VPN automatically open all ports?

Just use dark comet and listen to a port.

Visit: canyouseeme.org and type the same port number.

Please tell us what you get there.

As we are sure from our side that all Ports are forwarded in BS VPN.

You can pm me or contact the BS owner.

If you got the free vpn just connect to it and all ports will be open when you use them
