Thread: [LameDownloader \[USG + FUD\] - source Codedom](#)

betona - July 13, 2012, 7:02 am

Well i thought i would share it because it's the old version,

The new one i will keep for my self.Coded for Opensc but since it's down any way i will share it here instead. It's the first thing i made that use codedom. And i made it to learn more and make a bitcoin miner...

Never mind usg in action, pretty simpel replace namesapce etc...

[img]<http://s17.postimage.org/6pmmg6oof/compare.png>[/img]

Builder is pretty forward, due i was to lazy a few bugg etc file will always be saved as 'dlamer.exe'.

[img]<http://s12.postimage.org/d21kyac2l/preview.png>[/img]

And a scan off build downloader...

<http://chk4me.com/check/public/5ac81F76nksrgT3fm5Nu1KO9G0d9Cx1>

Want the source ? pm me...

Builder only (obfuscated porly):<http://#/17046938323>

Credit: Dunno how made the them i used in builder but ^^ thx thx

Notice to hater, :P you see i can code now stop send me pm full off hate :D
