Thread: [Sending me the Users Username in an Email Automatically](#)

JeremyBeam - July 15, 2012, 12:34 am

I have an uploader where when a user submits an image, it emails the image right to my email account. I recently added user accounts to my site so that a user can submit an image with their account (So that they get credit for their uploaded image). I would like to make it so the email will automatically send the users name to me. How do I do this? Here is my code.

```
<?php
```

```
include('core/init.inc.php');
```

```
if (isset($_POST['name'], $_FILES['file'])){  
    $body = <<<BODY  
    From: {$_POST['name']}
```

```
Details:
```

```
    Name: {$_FILES['file']['name']}  
    Size: {$_FILES['file']['size']}  
    Type: {$_FILES['file']['type']}
```

```
BODY;
```

```
    mail_file('MYEMAIL@hotmail.com', 'MYEMAIL@hotmail.com', 'image', $body, $_FILES['file']);  
}
```

```
?>
```

```
<!DOCTYPE html PUBLIC "-//W3c//DTD XHTML 1.1 Strict//EN"
```

```
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-strict.dtd">
```

```
<html xmlns="http://www.w3.org/1999/xhtml">
```

```
    <head>
```

```
        <link type="text/css" rel="stylesheet" href="homepage.css">
```

```
        <meta http-equiv="Content-Type" content="text/html; charset=utf-8" />
```

```
        <title>Submit your image!</title>
```

```
    </head>
```

```
    <body>
```

```
        <p class="SubmitDesc">
```

```
        <b>Note: The page will reload after you've submitted your image.
```

```
        </p>
```

```
        <a href="index.html"></a>
```

```
        <div id="Uploader">
```

```
        <div>
```

```
            <form action="" method="post" enctype="multipart/form-data">
```

```
            <p>
```

```
                <label for="name"><b>Give your image a cool title:</b></label>
```

```
                <input type="text" name="name" id="name" />
```

```
</p>
<p>
  <label for="file"><b>Image:</b></label>
  <input type="file" name="file" id="file" />
</p>
<p>
  <input type="submit" value="Submit!" />
</p>
</form>
</div>
</div>
```

Use a PHP Session to check if they're logged in.. if they are then submit username if not submit "Anonymous".
