Thread: [Rats Rats I love rats](#)

Cfisc - February 11, 2010, 1:55 pm

I got pro rat and beast and my Site i made it to be hidden thats why It was made with google sites (<http://sites.google.com/site/trojandownloads>)
I got prorat Se and beast 2.07
What rats do you have and where can i download them?
:)

Charizard - February 11, 2010, 1:56 pm

I would download Cerberus. That's the RAT I use. Idk where to get it from, so just Google it.

plsmn22 - February 11, 2010, 2:02 pm

cybergate is one of the best, search around the forum in the Hacking Tools and Programs section. you can find tons of rats, crypters, and binders for free

AwwwYeah - February 11, 2010, 2:03 pm

Spy-Net FTW :3.... .. xD!

Air - February 11, 2010, 2:04 pm

agreed with plsmn, cybergate the best ;D

Cfisc - February 11, 2010, 4:41 pm

Thanks All of those were great! :)
I also have netbus too!

CYBERGATE ATW

INullkidl - February 11, 2010, 5:14 pm

I currently use Cerberus only because it is the first RAT I have downloaded in 10+ years and already had it spread before I read up on other new programs. Its stability is SO-SO. I don't have much of a problem with it except my servers restart every time I get a password or keylog logs. To be honest I was bored one day and decided to look up Sub7 and when I saw they announced (two days before I looked it up! ironic?) a new version is being released at the end of this month. Figured it was a sign that my computer wanted me to stop neglecting it :] Will be the best RAT when it is released. (again!)

Danielsoltys29 - February 12, 2010, 10:31 am

ProRat v.119 SE or something like that is backdoored. It got my comp infected.
