**Wargod** - July 16, 2012, 4:50 am

this looks very nice .!!! Thanks i am gonna try this ... BB pws.txt :P

**Gr0wlit** - July 16, 2012, 4:51 am

(Jul 16, 2012 04:50 AM)Wargod Wrote: [\[CITE\]](#) ... BB pws.txt :P  
thank you! What BB pws .txt? What are you talking about?

**Wargod** - July 16, 2012, 4:55 am

i have one .txt that does the work your programme do :PP

**GrOwlit** - July 16, 2012, 4:56 am

(Jul 16, 2012 04:55 AM)Wargod Wrote: [\[CITE\]](#) i have one .txt that does the work your programme do :PP

i continue to not understanding what are you talking about man...

**x64** - July 16, 2012, 4:57 am

Why do u only give the binary file and not the source because it's very easy to make this.

**GrOwlit** - July 16, 2012, 4:58 am

(Jul 16, 2012 04:57 AM)Just1c3 Wrote: [\[CITE\]](#) Why do u only give the binary file and not the source because it's very easy to make this.

I can't see in your threads something like this...

**x64** - July 16, 2012, 5:00 am

(Jul 16, 2012 04:58 AM)GrOwlit Wrote: [\[CITE\]](#) I can't see in your threads something like this...  
No?

<https://hackforums.net/showthread.php?tid=2513804>

**Yolo Swaggins** - July 16, 2012, 5:01 am

Thank you op, i love it :) What did you code it in?

**x64** - July 16, 2012, 5:02 am

(Jul 16, 2012 05:01 AM)INS4N3 Wrote: [\[CITE\]](#) Thank you op, i love it :) What did you code it in?  
Ehm no offence but this is the VB.net Section ?

**GrOwlit** - July 16, 2012, 5:03 am

(Jul 16, 2012 05:00 AM)Just1c3 Wrote: [\[CITE\]](#) No?

<https://hackforums.net/showthread.php?tid=2513804>

Not the same features of mine application, read all..

**Yolo Swaggins** - July 16, 2012, 5:03 am

(Jul 16, 2012 05:02 AM)Just1c3 Wrote: [\[CITE\]](#) Ehm no offence but this is the VB.net Section ?  
Ah thanks :) Dident notice dat i always "View todats posts"

**GrOwlit** - July 16, 2012, 5:04 am

(Jul 16, 2012 05:01 AM)INS4N3 Wrote: [\[CITE\]](#) Thank you op, i love it :) What did you code it in?  
Thank you very much.. Since i've released it into this section, this is coded in VB.NET;)

**x64** - July 16, 2012, 5:08 am

(Jul 16, 2012 05:03 AM)GrOwlit Wrote: [\[CITE\]](#) Not the same features of mine application, read all..  
U said Something like this.

Think before u say something :)

(Jul 16, 2012 04:58 AM)GrOwlit Wrote: [\[CITE\]](#) I can't see in your threads something like this...

(Jul 16, 2012 05:03 AM)INS4N3 Wrote: [\[CITE\]](#) Ah thanks :) Dident notice dat i always "View todats posts"

No problem haha , I've that sometimes too ^^

**GrOwlit** - July 16, 2012, 5:09 am

Ok man, you have done it, compliments, but please, get off my thread. Thank you.

**x64** - July 16, 2012, 5:11 am

(Jul 16, 2012 05:09 AM)Gr0wlit Wrote: [\[CITE\]](#) Ok man, you have done it, compliments, but please, get off my thread. Thank you.

@ontopic ur GUI looks good , how'd you did that?

**Gr0wlit** - July 16, 2012, 5:12 am

(Jul 16, 2012 05:11 AM)Just1c3 Wrote: [\[CITE\]](#) @ontopic ur GUI looks good , how'd you did that? I haven't use any theme, this is just the basic theme of visual studio

**x64** - July 16, 2012, 5:15 am

(Jul 16, 2012 05:12 AM)Gr0wlit Wrote: [\[CITE\]](#) I haven't use any theme, this is just the basic theme of visual studio

Hmm ok , I don't use themes anymore. Don't really like them.

Basic GUI of vs is the best haha ?

**Ingenuity** - July 16, 2012, 6:14 am

Looks very nice. If you can get some sort of browser integration, you might be able to compete with a program such as lastpass.

**idonotcare** - July 16, 2012, 6:32 am

(Jul 16, 2012 06:14 AM)Ingenuity Wrote: [\[CITE\]](#) Looks very nice. If you can get some sort of browser integration, you might be able to compete with a program such as lastpass.

Lmao, you dont know how much work that crap is, you actually need to learn stuff about writing plugins and that crap is coded in c++

So no chance for a browser plugin bro.

**Ingenuity** - July 16, 2012, 6:49 am

(Jul 16, 2012 06:32 AM)idonotcare Wrote: [\[CITE\]](#) Lmao, you dont know how much work that crap is, you actually need to learn stuff about writing plugins and that crap is coded in c++

So no chance for a browser plugin bro.

What technologies are used to write extensions for Firefox

Firefox addons are written in XUL and Javascript

What technologies are used to write extensions for Internet Explorer

Internet Explorer addons can be written from Visual Studio in VB and C#

What technologies are used to write extensions for Chrome?

Extensions are written using the same standard web technologies that developers use to create websites. HTML is used as a content markup language, CSS is used for styling, and JavaScript for scripting. Because Chrome supports HTML5 and CSS3, developers can use the latest open web technologies such as canvas and CSS animations in their extensions. Extensions also have access to several JavaScript APIs that help perform functions like JSON encoding and interacting with the browser.

Yeah... we all know they're written in C++

tl;dr: You're full of shite. But I knew that already.

**Godemis** - July 16, 2012, 9:35 am

Another nice program Gr0wlit , will try it out later thanks.

**.CRz** - July 16, 2012, 10:47 am

So, you dont generate any "dB.txt" file, How do you save it? Using Settings?

**Gr0wliit** - July 16, 2012, 11:25 am

(Jul 16, 2012 09:35 AM)-?BSOD?- ? Wrote: [\[CITE\]](#) Another nice program Gr0wliit , will try it out later thanks.

Thank you man, hope you like it, tell me what do you think!

(Jul 16, 2012 10:47 AM)Cyber.CRz Wrote: [\[CITE\]](#) So, you dont generate any "dB.txt" file, How do you save it? Using Settings?

I store all in system's registry, so yes, it generates a file, but is a registry key, no bulky files...

**Boudoire** - July 16, 2012, 11:29 am

Thanks for sharing bro' :)

Seeing :P

**Oppresor** - July 16, 2012, 12:11 pm

Are you planning on releasing the source of this application? Would be great...

**Gr0wliit** - July 17, 2012, 1:56 am

(Jul 16, 2012 12:11 PM)Oppresor Wrote: [\[CITE\]](#) Are you planning on releasing the source of this application? Would be great...

Not yet, i've put effort to make this, hope someone will use this...

**VPN** - July 17, 2012, 2:21 am

Nice work dude.. releasing source could be better for teaching purposes.

**Gr0wliit** - July 18, 2012, 2:09 am

(Jul 17, 2012 02:21 AM)Vormz Wrote: [\[CITE\]](#) Nice work dude.. releasing source could be better for teaching purposes.

Thank you, maybe soon,i will release the Open source project:)

**.CRz** - July 18, 2012, 3:49 am

This is not even close to secure, i wouldn't use this for myself.

And becuse secure password Managers lack in HF i'll publish my own in a few days.

**Gr0wliit** - July 18, 2012, 4:12 am

(Jul 18, 2012 03:49 AM)Cyber.CRz Wrote: [\[CITE\]](#) This is not even close to secure, i wouldn't use this for myself.

Thank you for your comment, can you tell me why this is not even close to secure, in your opinion?

**.CRz** - July 18, 2012, 4:16 am

(Jul 18, 2012 04:12 AM)Gr0wliit Wrote: [\[CITE\]](#) Thank you for your comment, can you tell me why this is not even close to secure, in your opinion?

Would you trust your own software to store your bank account info?

**Gr0wliit** - July 18, 2012, 4:20 am

(Jul 18, 2012 04:16 AM)Cyber.CRz Wrote: [\[CITE\]](#) Would you trust your own software to store your bank account info?

If Microsoft will release a Password Storage software, i also will not trust it for my bank account info. My bank info are stored on a paper, that is the only one safe place in my house, but i store others passwords in my software, yes....

In your Password Manager, you store your bank account info?

**.CRz** - July 18, 2012, 4:35 am

(Jul 18, 2012 04:20 AM)GrOwlit Wrote: [\[CITE\]](#) If Microsoft will release a Password Storage software, i also will not trust it for my bank account info. My bank info are stored on a paper, that is the only one safe place in my house, but i store others passwords in my sotfware, yes....

In your Password Manager, you store your bank account info?

No i dont, it was just an example.

Ok, a better example, would you store your PayPal account (if you had/have)?

**GrOwlit** - July 18, 2012, 4:52 am

(Jul 18, 2012 04:35 AM)Cyber.CRz Wrote: [\[CITE\]](#) No i dont, it was just an example.

Ok, a better example, would you store your PayPal account (if you had/have)?

Yes i will. You haven't explained me why you think that this is not secure..

**.CRz** - July 18, 2012, 4:59 am

(Jul 18, 2012 04:52 AM)GrOwlit Wrote: [\[CITE\]](#) Yes i will. You haven't explained me why you think that this is not secure..

You'll see when i release mine ??

**Oppresor** - July 18, 2012, 1:10 pm

(Jul 17, 2012 01:56 AM)GrOwlit Wrote: [\[CITE\]](#) Not yet, i've put effort to make this, hope someone will use this...

I'm using it bro! Make it open source! Lot's of things people can add to this!

**GrOwlit** - July 31, 2012, 10:28 am

(Jul 18, 2012 01:10 PM)Oppresor Wrote: [\[CITE\]](#) I'm using it bro! Make it open source! Lot's of things people can add to this!

Thanks, but currently i want to develope more this, when i stop to update it, i will make the project open source so member with more experience can add whatever they want..

**uykucuibo** - August 27, 2012, 6:09 am

3 yil tekvonda yapdim 150 kez maca giridim sadace 1 rinde beraber kaldim ve kendimle hala gurur duyuyorum haaa tekvondoo

**GrOwlit** - August 27, 2012, 9:53 am

(Aug 27, 2012 06:09 AM)uykucuibo Wrote: [\[CITE\]](#) 3 yil tekvonda yapdim 150 kez maca giridim sadace 1 rinde beraber kaldim ve kendimle hala gurur duyuyorum haaa tekvondoo

Ok, thanks for your opinion, i think you're right...

**Jagster™** - May 12, 2013, 7:57 am

OP,

This is a very nice tool! Thank you for sharing. It was just what i was looking for in a free manager!

Thanks a bunch

**KK123** - May 12, 2013, 11:18 am

Would I use this so people cant decompile my visual basic made phisher [pm me please] thanks

**Polymatical** - May 12, 2013, 11:44 am

I really appreciate your contribution but I don't want really understand the reason for a password safe.

However I really like the GUI and I can say good job on the all the hard work done

**KK123** - *May 12, 2013, 12:25 pm*

(Jul 18, 2012 04:59 AM)Cyber.CRz Wrote: [\[CITE\]](#) You'll see when i release mine ??  
Not trying to hate. But you came by to advertise a product that you are trying to [sell].

**Cape** - *May 13, 2013, 2:59 pm*

Nice work Gr0wlit keep up the good work with future projects.

**Gr0wlit** - *May 15, 2013, 8:01 am*

Wow, glad to see that some people still find it useful!

**RXDs** - *June 6, 2013, 7:19 am*

please can you give me source code of this.Thanks brother.
