bot.mc - July 16, 2012, 11:42 am

This works 100% Taco, Demonic and I witnessed it in action

Features Include:

Full Feature List:

Custom SMTP Server (Make Sure You Type It Right)

Custom Carrier Gateway (If Your Victims Gateway Is Not In The Large List You May Find And Enter it Yourself)

Custom Number Of SMS To Send (Finally Have Where You Can Enter Any Amount To Send)

Save/Load Settings (Will Save Everything You Enter In The Fields, Restarting Your Computer Will Lose The Saved Settings)

Fixed XP GUI Issues

Stop Bombing At Any Time

Watch The Number Of SMS Sent In The Title Bar

No Longer Freezes While Sending

Added A Recent slave's Box Where You Can Select An Entry And Right-Click It To Bomb It Again Or Delete It From The List

Save/Load Recent Victims List

GMail Is The Default SMTP Server That Is Used Which Has A Limit On The Number That Can Be Sent

Has A Lot Of Carriers Already Pre-Entered For You.

SMS Looks Like

FRM: Senders Email

SUBJ: Subject

MSG: Message

What Is New In The Pro Version:

New GUI

Error Handling, For Example If There Was An Error Sending The Message It Will Ask You If You Want To Change The E-mail/Password You Are Using. This Is Just One Of The Many Error Handling I Have Added.

I've been on HF for a while now and I have noticed lots of these Pm me and post here and I'll send you a link threads. The fact of the matter is that when I do post and pm I never gets a response. Now I can understand the exclusive programs and I'm not trying to knock the OP but this program is offered for free on a few sites just by googling. Now I know all not legit and most with viruses but it's still possible to find. I feel like if I have to post and pm it should be your program or some thing that

cant be easily found.. Thats my opinion..

unlit - November 6, 2012, 3:27 pm

y0, thanks so much for this bro! :D

anonymous2020 - November 11, 2012, 1:51 am

pm me i would like to have this to try out thankss

milkchar - November 11, 2012, 7:55 am

This is one of the oldest and most used bombers around. Beaver wrote it and you are taking credit for it. You can find this program by simply doing a web search for "sms bomber"

OP is lazy and uncreative.
