here is a java code i made along time ago and recently found it while cleaning out my computer hard drive it will help prevent copying things from your website but you can still use Ctrl + C to copy things

```
Code <script language="JavaScript">
function right(e) {
if (navigator.appName == 'Netscape' &&
(e.which == 3 || e.which == 2))
return false;
else if (navigator.appName == 'Microsoft Internet Explorer' &&
(event.button == 2 || event.button == 3)) {
alert("Please don't steal my stuff!!!");
return false;
}
return true;
}
document.onmousedown=right;
if (document.layers) window.captureEvents(Event.MOUSEDOWN);
window.onmousedown=right;
</script>
```

Wrong section...

This section is for Java, not JavaScript.

Also, it doesn't stop people from going to file -> view source or what ever via their browser.

djfs shady - February 13, 2010, 5:27 am

i know and oops i didnt notice sorry thought i posted it in the right section

Zn4k3 - April 27, 2010, 10:36 am

Who cares..... thank you :D

djfs shady - April 27, 2010, 10:48 am

lol your welcome zn4k3
