Tips To Spreading By Johngianni

This guide was made for [DreamTeam©](#).

Introduction:

In this guide I will teach you how to spread. Spreading is one of the best methods to infect people with your server. It is better than getting people individually. There are several methods to spreading. Some are more effective than others. This mainly involves the drive by exploit. It is best if you search around HF to understand it since it is the most simple way to spread your server. Before we start, some people who are new to all this may wonder "What is spreading?"

Spreading- Spreading in this case means to get your server across to a mass of people. Usually by unique methods that are sometimes populated enough to get several people.

Youtube:

Youtube is a immensely populated site. Most people usually do this method. Some possible ways are making a program. For instance, a Runescape pin generator. If people fall for your fake program and run it program with your server binded to it then you can easily infect several people who come across the video. Another method I would say is using a drive by exploit. This is a link that a person opens and when they run a application your server infects them via the link. I believe the drive by exploit is always useful and usually always works.

My rating of spreading on Youtube is 10/10

Twitter:

Twitter can be effective sometimes depending on the amount of followers. Usually on twitter when you follow someone they follow back. When they follow you they can read your status. You are probably wondering how you can get several followers. It is quite easy actually. [Here](#) is a download to Twitter Blast Pro. Credits go to [Transmission](#) for having his thread on this. Just follow what he says and you should be fine. I chose this because it can automatically follow several people once you have a list full of Ids. You retrieve Ids from searching. After you have followed so many people you will noticed people also are following you. It wont be close to how many people you are following sometimes since not everyone follows back. After you are satisfied with your followers you should make a drive by exploit link. Read some tutorials around HF to learn about it. Then you can use ad.ly or use tinyurl on it. When your followers see this they will possibly click it. If you chose to be a female say something that will make them want to look. This sums up the Twitter spreading method.

TIP: I recommend pretending you are a female and even throwing in a picture. More people may follow you. Use a appealing username.

My overall rating on the Twitter method is 9/10

Omegle:

Omegle is a site in which you can talk to several random people. This can sometimes be effective

since usually always you see men searching for some sexy whores. Instead of individually messaging people to hit a drive by exploit link you create, you can use a Omegle bot. [Here](#) is one by [RidingSlow](#). Use this bot on Omegle and you should get plenty of people.

My overall rating on Omegle is 8.5/10

Myspace:

Myspace can be used for pretending you are a female and pretty much getting people to your link. It is similar to the other ways only on Myspace however. You need to add several people sometimes as well.

My overall rating for the Myspace method is 3/10

Torrents:

Torrents is a immensely effective method. Every day people use torrents to get all sorts of files. This piracy method millions of people use. What you can do is make a torrent file that has a program and your server can be binded to it. [Here](#) is a list of torrent sites from a fellow member on Hack Forums, [Himanshu619](#)

_. In conclusion, Torrents is a excellent spreading method!

My overall rating for Torrents is 9.5/10

AIM

AIM can be good as well. With its IM feature you can spread your server pretty nicely. I have provided a well written tutorial [here](#) by [WereWatching](#)

My overall rating for AIM is 7.5/10

Yahoo Chat:

Yahoo Chat is another method. If you pretend you are a female in these chatrooms several people will want to add you. After this you can infect them with your own method. Some social engineering ability may be required.

TIP: I reccomend asking for their MSN since you are better off getting them via there sometimes. That is mainly your choice. I just usually get their MSN sometimes.

These are all my methods for now. I shall post more if I manage to think of any. I hope you find this useful.

You are welcome. If I have more ideas I will try to include a bot to make the process more simpler.

How did you manage to not add torrent spreading considering it is the most popular and easiest way

to spread.

Far - February 12, 2010, 5:29 pm

Btw, and you don't have to add this, but going to "Adult - Singles" or "Teen - Singles" chatsites like 321teenchat is another awesome way. I usually get 20+ msn additions per "ADD MY MSN" request. You could research sites like that and maybe post a sub-section on your favorite one.

What should I use to make videos on youtube? Adobe Premiere is hard to use for noobs.

GreekMan - February 12, 2010, 6:10 pm

Do like Runescape or something people will look at. (Feb 12, 2010 07:04 PM)aznxmtg Wrote: [\[CITE\]](#) What should I use to make videos on youtube? Adobe Premiere is hard to use for noobs.

Do like Runescape or something people will search. Maybe a non working keygen you can make binded with your server? Not sure, be creative.

xFeaRx - February 12, 2010, 10:12 pm

pretty good tutorial. you should add AIM spreading

GreekMan - February 13, 2010, 6:40 pm

Updated a few stuff.

Mike Ross - February 13, 2010, 7:01 pm

Nice guide I will use these tips soon.

EASTBAY LOC - February 13, 2010, 10:51 pm

well written

2shortssssssssssssss as for the yahoo chat guy he was just a complete retard

.crudd™ - February 13, 2010, 10:53 pm

Yah i also get alot of luck on 321 chat.. Just get a keylogger or your rat. Bind it. Say your 15/f and lookin for someone to rate your pic. Make your rat with a pic. Make it .jpg and bam hella pedos message you hahah..

Anywayzzz. Nice stuff man must of taken you forever to write..

SaiyaIV - February 13, 2010, 11:12 pm

how are torrents not rated the most effective? the largest botnets are created from torrents. that kid that backdoored 29000 copies of windows7 did that jst from a couple popular torrents... people need to stop wastin time with xbox gen youtube vids and predator chats.

Thanks, glad you like it. That tip is effective however.

dingdong78 - March 5, 2010, 10:06 am

nice tutorial i didn't know twitter method can work.

GreekMan - March 5, 2010, 10:41 am

With the twitter bot anything could be possible. Just make sure a drive by exploit is used for that one.

Stacker - March 5, 2010, 1:03 pm

Nice one. Thanks for sharing. will surely try it.

TridentX - March 25, 2010, 7:38 am

I pretend to be a bi female. I reel in guys, lesbians and curious straight girls. Works like a charm.
