Thread: [??Fuzion Monetizer RAT Source?? ?100% FUD? I Start your own I ?Make Hundreds?](#)

Heroicis - July 21, 2012, 11:36 pm

Hey,

Fuzion Monetizer RAT stopped because Lowkey left, I decided that I'll sell the source code, so someone can make a project similar to the one that made me hundreds.

If you don't know this product what it did was (admin side) you'd sell logins/activations to the bin so that the customers could run adf.ly clicking script that was FUD and had several anti bans. It also can click adf.ly competitors such as Adblue and Bc.Vc. And last but not least it can also mine bitcoins, turning your slaves into money machines.

Impuhsive - July 21, 2012, 11:38 pm

Looks very nice. Sad to see you guys stopped the project. Good Luck with sales.

Themagicshark - July 21, 2012, 11:40 pm

Vouch for micro, he is top notch.

Thanks bro

?????Thr????? - July 21, 2012, 11:56 pm

Vouch for the Source to Fuzion Rat, it's some nice code guys ^.^

Silexx - July 21, 2012, 11:57 pm

FOWLR - July 21, 2012, 11:59 pm

SIM-747559 - July 22, 2012, 12:02 am

Did you all make the activator/admin panel? I would be interested in buying that :) PM me micro!

Themagicshark - July 22, 2012, 12:03 am

Yea, he did. The activator is very very hq.

Farcast - July 22, 2012, 12:14 am

I bought the RAT, it doesn't work properly.

Themagicshark - July 22, 2012, 12:22 am

It works fine, you just have no idea how to use it, or your bot seller scammed you.

tak819 - July 22, 2012, 1:38 am

I bought the rat for almost 10days but the account still not activated. Still waiting for micro.gov to reply me pm.

And also if this RAT is sold? How about the existing customer who bought the bot?

Business.Gov never replied to my mp

tak819 - July 22, 2012, 9:35 am

Unfortunately, the seller and coder cant help me in activating my account. End up themagicshark pm me saying he can activate my account for me. But until just now i try to login. It say "I cant find your username, remember this is case sensitive". It usually show"account not activated. Please wait upto 48hr." This is the second time i got this message.

Money sent as gift as request. Cannot be dispute. Got no reply from Business.Gov.

DOOOM - July 22, 2012, 9:47 am

Do i get a refund? I bought like 5 hours before the thread was closed. - ____ - No fair. I even paid for the 25\$ one.

Dark_Sniper - July 22, 2012, 10:27 am

So the whole project has been stopped?

I just wanted everyone to know that even if I bought installs or updates from various people... or even if I spread my own bots... I never made over 30 cents with this. I have been extremely patient with this. \$150 later and over 10k bots later I have nothing.

@Magicshark

Why are you trying to tri-force with Micro and Bussiness they need you, and you are not on their official team. also you sent me a pm a couple weeks ago showing a pic that you got \$5 and it "worked" well now, this is only proof, that in only a couple weeks you too can make measly \$7 :)! Stay on topic. This is a sales thread if you have a problem with anyone just pm them.

Back to topic,
Still selling.

Themagicshark - July 22, 2012, 5:57 pm

Nice graphics you got, who made it?

Punisher - July 22, 2012, 6:25 pm

I purchased this product with high hopes of it actually doing what it advertised and was disappointed.

1. This isn't FUD, my bin is detected and I'm sure if other customers checked, theirs is too. My bin was detected before I even shared it to a single person.
2. AdBlue doesn't even work, so we can't make money off of that feature. All of their links direct to a 403 page. This was a problem from the start.
3. The bitcoin miner only works if the computer is idling, which rarely happens at all

I have over 450 click and almost 900 runs (about 350 bots, all unique) with only ONE PENNY and 12 clicks on my ad.fly link, and only made 0.00007794 bitcoins.

That means I'm down about \$24.9992206

I'm really unsatisfied with my purchase, and I don't ever see me getting my money back.

Oh well. ?

I'm not sales bashing, providing adequate and accurate feedback is not bashing.

Just because my review of your product wasn't positive doesn't mean I'm bashing your sales.

I was simply providing your customers with information about your product that you forgot to mention in the OP :)

Good luck with sales, I hope you do great!

Themagicshark - July 22, 2012, 9:25 pm

Actually it is fud and works fine, maybe you should get more installs. Also it is important on where they are located, sir it works fine, if you aren't getting enough \$, then buy some USA installs. Learn how adf.ly works, after all that is what this is based off of. IT is location dependent. As for adblue, you can use bc.vc or just about any other adf.ly competitor that uses the same system. And the bitcoin miner works 24.7, even when the computer is not IDLE. You sir have no idea how the product even works.

I have a plentiful stream of pure USA installs coming in, all unique that I didn't pay for.

I've earned over \$50 off of ad.fly long before this product was even constructed. Trust me, I know how it works.

The miner uses bitcoinplus.com, and their script pauses activity when the user starts doing other things. Try it. Get on the site and start the miner, and then go browse the internet. When you click back onto the page after a while the miner won't be working, the speed will be at ZERO.

You apparantly have no idea on how to use bitcoinplus, it still mines no matter what your pc is doing dumbass, it is just set at low priority.

Also the virus scan is not fake, we put protection on our bin which is detected, but the RAW BIN itself is undetected, therefore it is fud.

Here is a full report on the source everyone is buying.
No sales bashing just facts.
I am a previous customer.
My account was removed for no reason.
This product does not work... well.

I would file a report against the main post as this source potentially has a backdoor in it and needs to be reviewed--but someone already reported it.

Bought bots from various vendors. even spread my own. They just "disappear".

Now as for proof of what this bot actually does :

(this is with over a 7k botnet, and since around July 7th)

bitcoinplus :

as you can see very little activity. Oh well not what I bought it for.

adblue:

Ok so there is an error with this even though they say it works perfectly fine. That one click... is from me checking to make sure the link worked.

Ok now on to adf.ly:

[img]http://img705.imageshack.us/img705/5928/32262964.png[/img]

Wow look at that nice spike and then they drop and "disappear"... and 7k bots only give you like 80 views? I don't think so.

PS Micro who do you keep asking to delete posts that show proof of what this bot really does?

tak819 - July 25, 2012, 12:20 am

My little review here.

Before buying this fuzion monetizer. Business.Gov reply me within 24 hours. After i get the product. He NEVER reply me. Until now.

I bought the product and activated after 8days by Micro and he manage to answer SOME of my question in skype.

Finally, Account inactivated in 2 days time. Although i do not know the reason. Im frustrated with this product and give up.

I did not make any money with this money so i cannot provide review on how it work.

Thats my experience.
