I have a question regarding the hosting that comes with this. Il send you a PM sir.

If people pay other people \$5 to register under their username during the 50% off, they'll get free licenses and the buyer will get \$5 licenses. You're making money regardless, but in terms of value your product could potentially be handed out for "free" due to this 50% off deal. Just pointing that out.

Well it looks like they have a week to try that method out. ;)
