1. Wong section
2. Don't post your login info
3. Don't post your S/N
4. It's hard to understand you're post, but I'm assuming you are upset because you bought a product for "Lifetime" and after X amount of time it stopped working... Please remember that "Lifetime" means the Life of the product, not the customer. Also, most projects fail within 2 months anyway. Next time, invest in a quality, long running crypter.

Killa was selling the crypter when it wasn't FUD and knowing that he would be leaving

Is funny how lifetime is used here .Is more you rent not buying it ,it will be working till the owner decide to close is project !

I remember one day i have buy and the other the project was closed !
This is the Life ...

lifetime =project time !
