Thread: [add vps users,change passwords, and delete vps users](#)

Yelium - July 22, 2012, 5:05 pm

hey everyone just a little helpful tutorial, or basic commands which ever you call it on how to add users to a vps, how to delete them, and how to change users password

ok so the first thing i will show you is how to add a user

adding a user to vps: adduser (username here)

when adding a user you dont use the parentheses

should look like this <https://gyazo.com/377189de5089fc26c79c43e42810f839>

--

changing password: passwd (username here)

should look like this <https://gyazo.com/eb3abc4ca009a0f08cd4b355b0fc58cd>

again we dont use the parentheses

--

delete a user: userdel (username here)

should look like this

<https://gyazo.com/fc482e98ad461467c0beaef7e6c2e67d>

thanks for looking, not the best tutorial just trying to help out the noobs and the community :p

"i sell vps's, and allow dos atm im trying to start my own company"

tron - July 22, 2012, 8:38 pm

Wow how elite, which website tutorial you get these elite commands from?

Stop trying to up your post count with bullshit like this.

Tron
