Thread: [\[TUT\] How to eWhore on Craigslist for Noobs + How to avoid Ghosting \[TUT\]](#)

Cliff Dog - July 23, 2012, 12:01 am

if i get 20+rep ill post an eWhore pack!

This is a tutorial of how to eWhore craigslist and avoid being ghosted at the same time so you can maximise your profits and avoid wasting your own time.

Step 1: Go to craigslist and choose a common city to post in
the best cities are the following in the states and the uk

UK

- london
- manchester
- birmingham
- edinburgh
- aberdeen

US

- los angeles
- new york
- boston
- houston texas

Step 2: go to w4m
casual encounters > no strings attached fun

post title: selling nudes! ;)

content: Hey guys!! as the title says selling some nudes which i took earlier today, got about 100 pics in total including 40 i took this afternoon so if your interested snd me a msg and ill get back to u asap!! ;) x x
thanks

Enter your email address and upload a couple of pics (non nude)

Step 3: sit back and relax and wait for people to start emailing you interested in the nudes
recommended prices

\$20 90 pics

\$10 40 pics

or just use your own judgement

Now you may notice after a while you start getting ghosted, this means your ads are not showing up on the listings even though craigs list are telling you that they are posted.

To do this ensure you do the following things regularly

1 - change your email

after you made 2-3 posts change your email and use a new one

2- change your ip

- again after you have made a few posts change your ip i usually do this after about 3 posts

3- change the thread title and the thread content
change it so the title changes regularly so something like this
selling nudes! ;)
sellin nude pics!
personal nudes for sale x

also be sure to change the content of your ad as well.

If you follow these steps on this post you should be making yourself some decent money.

I would have liked to see your results from this method, do you have it?

Murky49 - July 23, 2012, 12:43 am

Only problem with saying that you're selling nudes is that Craigslist will pull the add - fast.

This will just get you banned and also you're going to get negative rep because of that. I won't give you a negative rep or report because you're new. I'm quite sure other people would do that. Read the [Help Docs](#).

This is terrible, and this is why Craigslist is screwed up now.
Thanks for ruining method for many others.

I made over 500 monthly until idiots like OP came in the picture, now I can't even use Craigslist anymore.
