You can easy open the same cpanel 5 times... ?

poision-v1p3R - July 25, 2012, 9:14 am

@thePnyWizard: r u fucking kidding me... ? if u want proof then i can give u access of the cPanels ..

So, think before u post..

And Also check in Address Bar.... You can find Difference in address bar...

? ?

So, think before u post..Here's what I thought:

>One tiny picture

>5 URLs, completely hidden

Therefore

>All windows are identical except the session on the URL. 'cpsess593205832985' or whatever.

You can easily change the session by logging out and in to the cPanel.

Chill your tits, this is a logical thought. And I don't want your proof nor access, I was simply saying it. Also, I always think before I post.

If you don't have time to answer, you should not respond. I love that kind of attitude - Firstly attacking at a comment you don't like, receiving another, you have nothing to say so you go over the whole "I don't have time for this" excuse. ohplz.

>n00b posts like fake that u thought 5 time

Makes no sense. Firstly, a post can't be a 'noob', much less a 'n00b' (wtf is that?). I was posting my opinion, it has nothing to do with being a 'noob', hence the message does not include any skills.

(Grammar, maybe? lul)
