Thread: [\[Noob Friendly\]Cinema 4D tutorial Serie's #1\(Layout's\)\[Noob Friendly\]](#)

**Ryuuji Takasu** - July 28, 2012, 7:09 am

Well didn't do a tutorial in a long time so I decided to make one this one is about how to create your own Cinema 4D layout.

This will work on every version of Cinema 4D(I think).

More tutorials will come soon to since I have a Laptop now :D.

Probably gonna make some sort of short tut series about Cinema 4D you can count this one as #1.
