I don't get why people even care about r00tw0rm and Intra to be honest.
So many fanboys. Just leave them be and stop giving them what they want; publicity.

Agreed.

All of this e-drama is really, really stupid and time wasting. And not to mention, boring.

imafaggotk - July 28, 2012, 8:11 am

No offense or anything but fuck. If you can't speak english just write it in your native language and throw that in google translator...

pwntoken - July 28, 2012, 8:40 am

Guess what? this message was for Team Intra.
I don't have the time to waste on other HF skids, Lulz.

I will be back again within 3 months :)
Catch you later Intra and Mx.

I hate to break it to you but the three users above you can code quite well.
I know what I'm capable of, and I've seen what the other two can do.

Please don't come back, I don't want to be picked on anymore.

Well, with my greatest respect sir, I don't see a point in arguing with you, I do know you have

grudges against Intra, but being Intra's friend team, it doesn't mean, I am against you or I have a grudge against you. The post about "being a skid" was/is/and never will be intended for you :)

I am here, just to keep an update on r00tw0rm. I hope you get my point.

I know you Phizo, you are a good PHP programmer, and have got a few POC on those exploits, you also went into mess with the FBI squad, and went missing from HF. Have a good time, but nothing is intended towards well matured people here, all fucks goes to real skids.

Coming back on 15th August here, and after that on December possibly.

Ay. You're calling me a skid yet I was in Intra for 5 or 6 months before I left, and you're presumably doing all of this for Team Intra?

That has to be one of the most politest replies I've ever received, thank you for that. Not too many people reply as kindly as you just did since people usually take my posts the wrong way.

Although what you said is incorrect, I have nothing against Intra at all. I don't even know them personally so I couldn't develop a grudge even if I wanted to. The only thing I'm trying to point out is they get too much publicity and fanboys over virtually nothing. What makes them so special is what I wonder?

Again, I have nothing against them. If anything I'm more annoyed with the fanboys who chase after them.

E-drama is never boring, it keeps all the scenes from warez to vx up and running and different groups competing against eachother, which brings us new cool inventions....

If it's something, it's fucking confusing. I have no idea what OP just said. I will just take a guess that it's script kiddies vs other script kiddies, right?

Intra is a bunch of Havij faggots defacing boxes, I have no idea what r00tw0rm of openfire are about... skiddies?

Alone that you're pretending to be a famous or useful person on a forum infested with pre-puberscent homosexually orientated pedophiles seeking for attention makes me think like you're indeed one of them.

If you check my thread history, I've deleted EVERYTHING I ever posted in this forum. Oh and guess what, I won it. Maybe you're just... jealous?

Of course I am a 'wannabe skid', you're right.

I have no world out of hackforums? Says a script kiddie that has a hacking team online of persons he does not even know in real life.

You're special, cyb3Rz w4rr10rzz

Oh, and for gods sake, learn English.

r00tk1t - July 31, 2012, 10:05 am

I also love how Intra gang dereps me for my comment, LOL...

Looks like Evisceration was exposed judging by your 'google search' about your team.

I like the way, kids, come at me :P

By the way, I am not a 31337 cyber warrior, haha.

I am just a person learning moar and moar.

plus I don't see any skill in you, so i will STOP posting anything about you, famewhore monster who thinks h3 c4n p0st in HF, he is n0w a h3r0. LOL

P.S: I don't care about reps.

Why must people fight? Does arguing over nonsense on the Internet actually solve anything?

You're just pouring more petrol on the fire; leave it alone and move on with your life.

iPwnSkids - August 1, 2012, 4:37 am

Implying anyone gives a fuck. Team Intra is a bunch of noobs who perform SQL Injections all day, symlink sites and whore for attention. Not to mention they act as they know something, but they are some skids in reality. On the other hand, Team Openfire? What the fuck, skiddies from a shitty country called India? LMAO. R00tw0rm at least knows something, they have contributed a lot to the worlds of exploits. You jelly motherfuckers rage at them all the time, but they pwn you and disappear like a Ninja. What about Mx. skid's challenge to R00tw0rm? What the fuck did he accomplish? Stop arguing. Intra got hacked because they were skids and poor who can't afford to buy a VPS for their team. Wait, maybe they had the money but can't setup the server? Lol. Team Intra = Skids. Openfire = Ass kissers of Team Intra. HF = Fanboys of Team Intra. Close this shit and stop arguing.
