Thread: [\[Tutorial\] Your own fear.exe](#)

0xBB - July 28, 2012, 12:45 pm

There is many downloads on hf for fear.exe But sadly most of them are backdoored and someone even if they arent, detected as a virus .

So there I made you guys a little tutorial on how create your own fear.exe and scare the sh? out ur slaves !

Create new windows form project, name it whatever you want.

Click on form one, make opacity 0%. Set Showintaskbar to false, windows state to maximized , Form borderstyle to none . Once that's done, google some scary image and apply it as background. Make sure in backgroundimagelayout you set it to "stretch" . Once its done, double click the form , select all and paste the following code :

```
Code Imports System.Runtime.InteropServices
Public Class Form1
    Private Const APPCOMMAND_VOLUME_MUTE As Integer = &H80000
    Private Const APPCOMMAND_VOLUME_UP As Integer = &HA0000
    Private Const APPCOMMAND_VOLUME_DOWN As Integer = &H90000
    Private Const WM_APPCOMMAND As Integer = &H319
    <DllImport("user32.dll")> Public Shared Function SendMessageW(ByVal hWnd As IntPtr, ByVal
Msg As Integer, ByVal wParam As IntPtr, ByVal lParam As IntPtr) As IntPtr
    End Function

    Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles MyBase.Load

        timer1.start()

    End Sub

    Private Sub Timer1_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Timer1.Tick
        Try
            SendMessageW(Me.Handle, WM_APPCOMMAND, Me.Handle, New
IntPtr(APPCOMMAND_VOLUME_UP))
        Catch ex As Exception

        End Try

    End Sub

    Private Sub Timer2_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Timer2.Tick
        Timer1.Stop()
        Timer2.Stop()
    End Sub
```

```
Me.TopMost = True
Me.Opacity = 100
My.Computer.Audio.Play(My.Resources.Women_Horror_Scream__1,
AudioPlayMode.Background)
Timer3.Start()
```

End Sub

```
Private Sub Timer3_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Timer3.Tick
End
End Sub
End Class
```

Once its done, go to your project proprety, and click "add new audio" .

Warning

Must be a .wav file ?

Once this step done;

Change the following lane ;

```
Code My.Computer.Audio.Play(My.Resources.Women_Horror_Scream__1,
AudioPlayMode.Background)
```

The exact following name ;

```
Code My.Resources.Women_Horror_Scream__1
```

To your own video name. So exemple your video is named: Boo.wav

change it to :

```
Code My.Resources.boo
```

So it will be :

```
Code My.Computer.Audio.Play(My.Resources.boo, AudioPlayMode.Background)
```

There you are set !! Now save & build your fear.exe ? You dont need to send all the .dll files, the main fear.exe will work. I made a quick video that show this process :

[Video: http://www.youtube.com/watch?v=3mL_309Jij4]

Good luck and for any questions , ask here. ?

kalwat - July 28, 2012, 12:48 pm

would pay millions for someone to add this feature into a rat.

RawezH_KurdistanY - July 28, 2012, 12:51 pm

Nice good your hand bro .. ?

? you can still make your own and Start it on your victim's pc . And yeah ? would be amazing if someone included a "scare" section ?

SpaceBaby - July 28, 2012, 12:54 pm

Could someone explain to me what a fear.exe file is? I've never heard of it :S .. thanks! :D

0xBB - July 28, 2012, 1:27 pm

People used to download a file called "fear.exe" Its simply that girl in scary maze that pop up. It set slave's pc volume to max and scream xD . Can't remove the face till the scream is over (in this case , i used a 5 seconds scream so I set the timer3 to 5000, If scream is longer 1 sec = 1000). I saw few asking for it and most of them are virus or even if they arent, windows detect them as a virus ? . So I decided to make a tut on how create your own one ?

To put it simple , its a tool to scare your slave haha

Injector - July 28, 2012, 1:28 pm

Thanks for this

I will be creating this and replacing the icon and removing .exe :)

Quality_k1nG - July 28, 2012, 1:29 pm

Hi very nice tutorial keep it up
thank bro:)

MistaCode - July 29, 2012, 1:08 am

Hm, well i aint using this but nice work ;)

Mastery - July 29, 2012, 3:33 am

Great tutorial! Can you add some download links to the Picture (Btw thats linda blaire, who plays in the movie "The exorcist") and the screaming? Thanks!
