How have you contributed to the community? I have made tutorials, I have made Ebooks (In the L33T & UB3R Advanced Methods' section), I have always posted HQ, I never ever troll, I have always helped members out when I can, I have given advice to members, been a trustworthy person, & I have always been respectful.

Have a nice day.

Why should you receive this crypter? Well as you can tell by my age, I can't afford a real crypter. My parents don't trust their cards on the internet so that option is thrown away. I also never knew how it's like to infect someone. I think this is the only shot I have to get a crypter.

How have you contributed to the community? I have done many giveaways. In all of my giveaways I like to have almost everyone win, because I don't like seeing people be left out. I love to give as much as I love to receive. I just like seeing smiling faces and people being happy. I never do survey links or "l33t/ub3r only". The restriction leaves people out, and the survey, well no one can do those.

Thanks,

Why should you recieve this crypter? I really need a good crypter. I've bought BS Fusion but realized that I don't have enough money for a crypter. It would be amazing to have a premium crypter so I could crypt my BS server. It is useless without a decent crypter.

How have you contributed to the community? I am not doing those huge generous giveaways (like this <3) simply because I can't afford that. I'm here to help people but not like the giveaway style. I help members by posting serious replies to threads instead of trolling them. I've also posted quite many tutorials on here and I am planning to make more.

Why do you want access to a booter: I need a strong hitting booter for some RuneScape stuff etc.

Why do you deserve this: I've been looking for a strong booter for ages, but always made bad discisions. I've always been buying a not hitting booter, or a booter that is very weak.

Do you love me: Yez.

Booter:

Name: Ida

Age: 16

Country: United States of America

Why do you want access to a booter: I want access to this booter because I keep getting ddosed all the time everyday and I am sick of this I have a booter but all I could afford is a \$5 package so thats what 2 min maybe. The user that boots me has him own booter and has a 1h boot time and I am sick of it, I mean it really sucks. Maybe access the this booter will give me the opportunity to get back at him for all these months of him doing to it me. I would all so like it to "stress test" some servers I play on to ensure there are up to working standards. Thank you for reading and have a wonderful day.

Why do you deserve this: As stated above I believe I deserve this because I have been taken down so many times (including today) and I am tired of it. I just wanna be able to defend my self its not like IRL if someone kisses you girl you can punch him in the face as many time as you want but on the internet if someone is ddosing you there is not a damn thing you can do about it unless you can come back better and stronger.

Do you love me: Cyber you know I love you, I have known you since you were Cudd :P Your an amazing guy and I believe you are one of the best members on this forum. Thank you for this opportunity.
