This looks pretty neat. At first I thought it was too expensive for a resolver, but after noticing the features in the gif, I thought it was worth it.

Good luck w/ sales, man.

Ok not trying to bash sales or anything im just saying this is not the only working exe skype resolver i have one that i coded and i released it for free .

Knowledge. - August 14, 2012, 10:36 am

That is bashing sales -.- , yeah but you got only 1 Resolver, i own 5 Resolvers, and if Skype will update, maybe they fix it? i don't use API so they won't will fix it.

But After that is patched I will create another one :)

and Why does it matter if its 5 instead of 1 ? lol !

Because not every API works fine ^^ and my Program has a lot of features, this GIF is old v.1.0 and i already got 1.3

Not to trash your sales or so but dont you think that, that isnt a bit exspensive?

Knowledge. - September 19, 2012, 11:54 am

Yeah, i saw a lot of these .exe . But i'm not using API's Im using a different Method which can Resolver "every" Username. and its A lot of Faster then the other ones, and it has 5 Resolvers
