Thread: [Subzero Siggy](#)

Kalvaxas - July 28, 2012, 7:36 pm

Ok, well honest to god, this is my first sig, and I think it turned out very nicely to be honest.. I fricken love it.

I would like to thank the member, Sexuality, for posting a tutorial for making signatures.. I did learn a lot from it.

So here it is, please C'n'C.. tell me if I need to change anything.. I have the psd saved.

American Apathy - July 28, 2012, 9:08 pm

I'm not digging it. I don't like the border and you didn't really put much effort around the points of action on the render. It looks like you just threw in some C4D's and a brush behind the render. It would be nice if you did something else around his hands besides a grunge brush, go the extra mile and at least put an orb in his left hand.

Kalvaxas - July 28, 2012, 9:19 pm

I don't want an orb in his hand.. Lol the grunge brush is to manipulate snow, since his power obviously deals with snow and blizzards.. As far as the C4D's and the brushes.. yeah, i know they might not look the best, but again, it's my first time making anything like this.

Thanks for your feedback :)

Good try. Color combination is good I think.

Mad0071421 - July 28, 2012, 11:01 pm

I like it man but not my thing tbh guessing i dont like the blue but thats subzero lol

Yamnasm - July 29, 2012, 12:26 am

Hmm, I'm not really liking the text font/size. It kinda sticks out like a sore thumb against all the sharp "icy" feel of the BG and the frost effects.

If the font was more angled, and larger, it would be nice.

Yeah, Text really isn't my thing since I haven't really messed around with it. I'll add a more sharp text to it and see what it looks like.
