6. NOT TAKEN- please

I want this because I got one rat and a ddoser.. i took a whole weekend to try to open ports but failed. i got 10 people to help me but failed.. Finally I reformatted and my ports opened. I used to have ddoser with 700 victims but I lost it all with no-ip =[

I haven't gotten one install yet.. nothing =[I spent over 70 on clients and rats etc..

Would be grateful if I could get some victims.. I always had like problems with my server being corrupted and never can get 100% FUD i only wished I could actually see zombies coming in.. :D

I need my ddoser spread I do need a crypt. This is a great unique giveaway! I'm pretty excited.

Can I have this service?:D

I don't have 500 posts but that shouldn't be so important.

7 please
