I would really love to become l33t. So far, I haven't made any tutorials, but my friend and I are working on a cool Minecraft client, and I may make some helpful tutorials later on.

I think I deserve L33T because I think it will really support me during my time at hackforums. I can help the community more, and provide more tutorials for newcomers. Although this might be a bit short, don't underestimate the power of words ;]

Good luck to all who enter, thanks for the giveaway ;P
