Thread: [Ioncube Decoding + Zend Decoding + javascript Decoding+other obfuscation 5 \\$ each file](#)

**TeLneT\_** - August 4, 2012, 2:13 am

I will decode any versions of "Ioncube" or "Zend" or obfuscated "javascript" "SourceGuardian" "TrueBug" "+ all other types of php encryption/obfuscations" encoding on all versions of PHP.

I even can decrypt the new ioncube 7.0+ [Latest release from ioncube 2012]

price for 1 file decoded:- 5\$ only [I Only accept LR]

File will be decoded and provided to you in minutes.

Can also decode Exploit Packs.

I will be able to regenerate the source code from given OpCodes. My professional decrypters are using my own Ioncube decoding method to have a stable result .

Send me PM with your encoded php file as Zip or rar and i will inbox you when decoded. And i wont go first after i get your file decoded ,i will provide you my LR,pay me ,i will verify payment and will inbox you your decoded file.

[I wont go first,no matters you got 5 k +rep ]

Regards.

Note:- Don't ask for vouch copies,i wont provide.

want to buy my decrypter tool source[231MB],coded in VC++,inbox me,will have talk. but make sure you can pay 3 k for source code.
