Thread: [? ? ? A complete Hacker Guide for Newbies ? ? ?](#)

WarrioR™ - August 4, 2012, 9:52 am

Q: What is hacking?

A: The terms "hack" are also used to refer to a modification of a program or device to give the user access to features that were otherwise unavailable, such as DIY circuit bending. It is from this usage that the term "hacking" is often incorrectly used to refer to more nefarious criminal uses such as identity theft, credit card fraud or other actions categorized as computer crime

Q: What is cracking?

A: Password cracking is the process of recovering passwords from data that has been stored in or transmitted by a computer system. A common approach is to repeatedly try guesses for the password. The purpose of password cracking might be to help a user recover a forgotten password (though installing an entirely new password is less of a security risk, but involves system administration privileges), to gain unauthorized access to a system, or as a preventive measure by system administrators to check for easily crackable passwords. On a file-by file basis, password cracking is utilized to gain access to digital evidence for which a judge has allowed access but the particular file's access is restricted.

Q: What is a virus/trojan/malicious script?

A: A computer virus is a computer program that can copy itself and infect a computer. The term "virus" is also commonly but erroneously used to refer to other types of malware, adware, and spyware programs that do not have the reproductive ability. A true virus can only spread from one computer to another (in some form of executable code) when its host is taken to the target computer; for instance because a user sent it over a network or the Internet, or carried it on a removable medium such as a floppy disk, CD, DVD, or USB drive. Viruses can increase their chances of spreading to other computers by infecting files on a network file system or a file system that is accessed by another computer..

Q: What is a stealer?

A: A stealer is a software designed to create viruses. This virus is called as a server. You send the server to the victim and if they open it all their passes (according to how the stealer is built) will be sent to you via email, or ftp or a php webhost.

Q: What is a RAT?

A: A Rat is a software created that created similar servers (virus). If the victim opens it they will be your RAT. You can have a complete access to their system. There are hundreds of features.
RAT - Remote Administration Tool.

Q: What is a keylogger?

A: A keylogger is a software designed to create servers. You send the server to the victim and if they open it all their keystrokes would be sent you via email, ftp, php webhost etc.

Q: What is BOT?

A: A bot is a malicious program which has several purposes.
They are usually told what to do by a botnet admin although many of the features now are automated.

Q: What is a BOTNET?

A: A botnet is a network of infected computers that all connect to one area where they are commanded by the botnet admin.

Q: What is a crypter?

A: All your servers that you create of a keylogger, stealer, RATs etc. are detected by antivirus. So in order to make it FUD (Fully UnDetectable) we use a crypter and crypt your infected server.

Q: How does a crypter work?

A: A crypter has a built in or external file called stub. This stub is based on common encryptions like rc4, xor, tweafish, blowfish etc. When you crypt your infected file the crypter embeds the stub onto your server and covers the server. Just like how you paint your rusted metals. And makes it undetectable from anti-virus.

Q: What is reverting?

A: Reverting is a technique used to obtain forgotten passwords. But a hacker uses this method to access the victims account.

Q: What is social engineering?

A: It is a psychological approach, where you manipulate people into performing actions or divulging confidential information, rather than by breaking in or using technical hacking techniques (essentially a fancier, more technical way of lying).

Q: What is DDos?

A: DOS - Denial Of Service.

This is using bots. If you have a large number of bots you make them send packets to the target site and make them break down.

Q: How is website and forum hack possible?

A: There are lots of methods. The most basic one is you find exploits on a webserver and use them to gain access and deface it.

Sql, XSS, LFI, RFI, DNS poisoning etc.

Q: Can everyone be hacker?

A: No, u need a brain and common sense.

Also, credits to all of those whom I mentioned here together with their threads, products, and such. TO BEGINNERS who found this or the other links helpful, DON'T FORGET TO SAY THANKS

Boot exe - August 4, 2012, 10:58 am

Nice Post Good information 2 know Thanks for valid information

cyrus900 - August 4, 2012, 12:56 pm

There's a little mistake in your title man (complete) , anyway nice post :)

Investigator' - August 4, 2012, 1:13 pm

I knew about the mentioned expressions and knew what are them, but your tutorial is really nice and helpful.

Thank you for making/sharing this!

iCosmic - August 4, 2012, 1:15 pm

On the last question, I believe it should say; "Can everyone be a hacker?"

Other than that, great post, bro!

Investigator' - August 4, 2012, 1:41 pm

(Aug 4, 2012 01:15 PM)iCosmic Wrote: [\[CITE\]](#) On the last question, I believe it should say; "Can everyone be a hacker?"

Other than that, great post, bro!

I'm not a grammar prof or such, but I think last question is totally right.

I mean It's correct with and without "a" too, am I wrong?

I'm not a native english speaker, just sayin'. So feel free to correct me if I'm wrong.

dbrown12331 - August 5, 2012, 12:43 am

I found this post extremely informative. Although I am currently a new member, I have learned a lot from members like you. I just wanted to let you and everyone else know that I appreciate how much information is passed down on this site.

Keep up the great work!

Unacknowledged - August 5, 2012, 4:58 am

Nice post, I think it can help out a few newbs that are joining HF.

Dhumti - August 5, 2012, 5:32 am

Very good information about hacking...

Thank you.

CodeRedd - August 5, 2012, 5:54 am

Nice post, This was thoroughly wrote out. Thanks.

Zero_Luffy - August 5, 2012, 6:02 am

<https://hackforums.net/showthread.php?tid=2669091> :) Nice for the all description :) and this is step wise ;)

jontaon - August 5, 2012, 6:40 am

Keep it up bro. Nice information for beginner to hacking.

khaleader - August 5, 2012, 9:15 am

Keep up the great work! thnks so much friend

SIM-1072338 - August 5, 2012, 3:25 pm

Thanks bro!

This was very nice to look at. I took a lot of information from this.

90210 - August 5, 2012, 4:15 pm

Thanks for this tutorial! Really helps for when I don't understand the terms said by other users.

theNewbster - August 5, 2012, 11:47 pm

Thanks for the explanations. (character limit)

alchemist2086 - August 5, 2012, 11:53 pm

Thank you soo much. Very informative

alignment - August 6, 2012, 12:00 am

Thanks for this, really informative.

kurlexworld - August 8, 2012, 12:04 am

THANKS FOR TAKING YOUR TIME TO WRITE THIS TREAD

Austerity - August 8, 2012, 12:42 am

Nice Thread, Pretty helpful, and good for finding meanings.

Turf - August 8, 2012, 6:26 pm

Thanks for posting this. I have zero knowledge about hacking so this knowledge is great for a newbie like me.

PoleVaulting - August 8, 2012, 9:49 pm

Good Thread! Helped me alot! :D Thanks Poster guy. lol

stifmeister - August 10, 2012, 6:57 am

Such a great information for newbies ... thanks for sharing ..

zilovich - August 16, 2012, 2:33 am

A big thank u!!

I'm a newbie an I want to get into the scene.

Really helpful TUT.

rodionu - August 16, 2012, 2:50 am

Nice ,is helpful...is very good for everyone

Crazy Ralph - August 16, 2012, 6:23 pm

thanks for this. It's good to finally understand the definitions....

xxtheman1xx - August 16, 2012, 10:30 pm

Good post and good information thanks

Sewer - August 16, 2012, 11:08 pm

This is a great tutorial. I hope to go to school for computer security. I would love to learn to hack websites ect.

Trixon - August 17, 2012, 3:31 am

Very nice easy to read easy to understand cheers

Doncaster Rovers - August 17, 2012, 4:01 am

Damn I wanted to become a hacker but then I saw this

Q: Can everyone be hacker?

A: No, u need a brain and common sense.

Evans - August 17, 2012, 7:18 am

Excellent information! Description of the terms was very helpful to me.

Mehdi.18 - August 17, 2012, 8:17 am

Thanks very helpfull, that answred a lot of question that i had!!

mattcharnock - August 17, 2012, 3:00 pm

thanks so much bro Got me excited and understand alot about this world thanks so much again :D

Joix - August 17, 2012, 5:07 pm

this is perfect for someone who's starting to hack, it shows what something are and what they mean
=]

Tony201 - August 17, 2012, 5:34 pm

this is really usefull information and description for people starting out, thank you

Esoterrick - August 17, 2012, 6:49 pm

1st time user, lots of awesome info. thanks.

NoShoes1990 - August 18, 2012, 6:58 am

Very informative... And nicely detailed, Thanks!

venom19 - August 18, 2012, 7:01 am

Interested in getting this ;)

PMing you now,

Arbitrage - August 18, 2012, 8:07 am

Thanks for the very basic information, well written! -^^-

fifflan - August 18, 2012, 10:56 am

Very good information about hacking...

Thank you.

Young Boss - August 18, 2012, 1:38 pm

Thanks a lot man! This tut is really going to help me out. I am new to this stuff, and had no idea where to start.

HotGrabba - August 18, 2012, 4:59 pm

thx helped alot just getting into this stuff

WarrioR™ - August 20, 2012, 8:30 pm

Hope you all like that guide :)

You have any question about hacking than post here . I will try to given answer as soon as :")

Thanks

agentedx44 - August 20, 2012, 11:17 pm

very informative... really great .. thanks

tapp - August 21, 2012, 4:07 am

Thank you for the meanings and all mate!

? Ace of Spades ? - August 21, 2012, 8:48 am

thanks for share bro keep it up.you always post some different.

virus1 - August 25, 2012, 12:57 am

I m reading your all threads you r just a Great guy .Thanks again for youour massive share its reallly helped me .

mrLyosha - August 25, 2012, 1:47 am

Really nice post,than you for it)))smiles for quantity of chars)

acedeluxe2012 - August 25, 2012, 1:51 am

Thanks for the information you've wrote there! It was helpful! ?

Mudge. - August 25, 2012, 3:54 am

nice post, very good information :)

zetza - August 25, 2012, 12:36 pm

This was some very good information, thanks for sharing your knowledge!

thejokeman50 - August 26, 2012, 5:11 pm

Nice work dude, very informative! Thank you

See De boy - September 24, 2018, 12:06 am

Thanks please teach me more

Legium - September 25, 2018, 3:40 pm

Thanks alot for the guide!

knowledge - September 26, 2018, 12:00 am

Thank you bro I am new to this.This will really help me to get started.

CocaColax - October 2, 2018, 9:13 pm

This is great guide thanks

Blackhawke2002 - October 3, 2018, 3:42 pm

this post is kinda old.....anyone know if there have been any significant updates?
