Thread: [\[Design/Building\] Static Website \[Design/Building\]](#)

Macintosh™ - August 4, 2012, 5:14 pm

Hey!

I'm bored - and am looking for a project to do tonight.
Will probably spend most of tonight working on it.
I'm offering person a websites built from scratch.
It can't be a PPD - since I hate those types of sites in general.

I'm thinking about starting a personal site soon. So I thought I should add to my collection.

This is free. But if you feel like throwing some bucks my way feel free.
I might not spend a ton of time on design the images - it is the only thing I might go out and look for (backgrounds, icons, etc) as well as any js or jquery components.

If you are interested. Request using the following guidelines:

I sent the request.

Add me:
gerble.gerble

Please don't PM me.
use the form i provided

kelseyxxoo - August 4, 2012, 6:00 pm

Added you on skype already, Waiting for you to finish your first project

Thanks for doing this service

Thanks ?

Website Name: None yet (I could design the logo myself)

Website Theme: Portfolio

Description: An easy video portfolio where you have blocks that's clickable which opens a window and plays a video.

Here's an example of the type of blocks I'm thinking of: <http://devatic.com/?theme=Daisho> (Darker theme)

I'm thinking like that except the whole site is one page with About Me, Experience, Examples, Team, etc.

Keypoints: Trying to make it on a single index page.

Contact Info (skype): SpankDaHobo

I'm almost done with the home page of my first site!

Anyone interested in seeing it.

Send me a message on skype!

Renpt0 - August 6, 2012, 2:43 pm

Send me your skype and we can talk to each others and I can teach you things and you can do the same :)

Macintosh™ - August 6, 2012, 11:49 pm

I've literally posted my skype 3 times on this thread... >.>

The first website is complete!

I will upload images very shortly!

(:
