You have to take into account that GTA V will not automatically be moddable, you also must take into account that this is months of people's hard work to bring together these scripts! The price is not set by me it is set by iHaZ i am just the seller. Gta iv is a classic, and is fun with mods if your going to flame without knowing

GTFO ?

Keep flaming bud - not my sales - their iHaZ's im just posting and accepting payments, and uhh free trainers dont have alot of the stuff this menu has! the features listed are baseline... basically saying thats not even 1/4 of the features, just another random flaming... If you aint got nothing nice to say dont say nothing

Have a great day

Firstly, i'm not flaming. You are just getting butthurt because we all know that you're selling something that isn't worth the money and you're trying to pull wool over everyone's eyes and make it look great. It could be worth SOME money, but not \$40.

Hey do everyone a favor and take affordable out of your title because a trainer with double the features yours has is worth like 15 dollars tops.
