Thread: [Dispostable Email Creator – Dispoable Email Address](#)

TLockcuff - August 5, 2012, 1:54 pm

What is dispostable, it's a free website the offers disposable email address for a period of 2 days then is removed. Why would I need this, well if your like me and need other email accounts to send junk mail to this software makes creating these email addresses even faster.

Features:

- Simple, Fast, Easy to use
- Recent History
- Small Size file >1mb

ing this old thread for some information

i was planning on using mailinator for a disposable address to send logs, but i'm thinking a longer-term solution is better.

what's the best service to use (known not to keep logs, etc.) for sending keystroke logs to? hushmail comes to mind, but i remember they were in trouble for giving up information a few years ago.

thanks
