4ngelWing,

Thanks for the feedback, I really appreciate it.

If you look towards the bottom under 'Colour Key' there is a price list if you wish, just in a different format.

Again, thanks for the feedback but I don't suppose you could unquote my post in yours? It is kinda' big :) !

I have PM'd you the colour guide just incase you don't follow.

Cheers!

RidingSlow - February 16, 2010, 10:31 am

Looks great, is spreading 3 dollars for a thousand downloads?

Oh, call me stupid. I deserve it.

Anyways good luck with everything! might even use your service x)

Also thanks for explaining in a nice and smooth way, other people would just flame me x)

Black Kat - February 16, 2010, 10:39 am

RidingSlow,

I'm afraid I cannot guarantee 1,000 downloads, as that would be dishonest, but I can get your file (I don't need to know what the file does etc.) across to huge amounts of people via my methods. I cannot supply you with a vouch as previous clients are not from Hack Forums, but I would love to help you get across to people.

4ngelWing,

Don't worry, its a simple mistake and perhaps I designed the thread in a hard to grasp way. I'm glad you understand now.

As for the fact I didn't flame you - surely I would be a complete fool to flame a potential customer? Its a pleasure to explain it to you calmly and helpfully.

uberuser - February 16, 2010, 10:44 am

great thread mate i think i will buy all the ebooks after the review....

-Dartz - February 16, 2010, 12:08 pm

Vouch for this guy. Created a very professional looking fake program to bind my virus too.

First one was free, quick and easy. Even after your first free one, the price is VERY low.

Giving this guy a 5/5 for his services. Keep up the good work. :)

Endonium - February 16, 2010, 12:11 pm

I'm a lazy ass.

Do you happen to do crypting services by any chance ?

If so I would pay you for a quick crypt (FUD ST/RT) and spread.

Endonium,

Unfortunately at the moment I can not offer a crypting service, as much as it hurts me to loose a customer. If you wish I can offer you a discount on the spreading service due to it being my fault I cannot supply you with exactly what you need. Please PM me if you are interested.

Many apologies.

Black Kat - February 16, 2010, 2:37 pm

Here is a Shell/Fake Program I just made for a client in a Spreading+Program package for \$4 in total.

[IMG]<http://i151.photobucket.com/albums/s146/Deamie/avpkeygen.png>[/IMG]

Keep all the requests coming, I've received over 15 already!

McCallum - February 16, 2010, 2:38 pm

Will you make my server scantime + runtime FUD? That would rock. ?

Black Kat - February 16, 2010, 2:43 pm

McCallum,

Hey there - please refer to my main post when reffering to a service you want as to avoid disappointment. That is a list of all available services I am offering at the moment and as of this time I cannot offer Server Scantimes or Crypting.

I still wish to offer you any other service you may want, but as stated, only services from the main post.

Thanks, Black Kat.

Black Kat - February 17, 2010, 12:40 am

Good morning everyone,

I am open for business again.

Black Kat - February 17, 2010, 8:46 am

Hackforums is back online, and I'm ready to start taking more requests. Spreading has been selling like hotcakes, I will stop it soon until I can complete current orders.

Black Kat - February 17, 2010, 10:58 am

ProVirus,

I will have to discuss this with you at some point tomorrow as I have lots of things to sort out at the minute, I hope that isn't a problem. I will get back to you on this, thank-you for showing a interest in doing business with me.

RidingSlow - February 17, 2010, 1:26 pm

How has the work on my request come. Sounds like you are busy, but just wanted to remind you.

Black Kat - February 17, 2010, 1:39 pm

RidingSlow,

Many apologies about not having got your Fake Program through yet, but as you guessed I am swamped with clients at the moment and am focusing on them first. I hope that's not a problem, hopefully I will have your Program to you soon.

-Dartz - February 18, 2010, 12:18 pm
