Thread: [\[HOT \] Sexy Signature Tutorial \[NEW \]](#)

Lucas Vercetti - August 6, 2012, 11:06 pm

Okay since I'm getting a lot of requests for this signature. I thought it would be nice to give away the tutorial.

Okay so I will be going by steps.

Step 1.) Make a 650x200 template. With a background of the hex code. #333333.

Spoiler [\(Click to View\)](#)

Step 2.) Now were going to create the text. I'm going to use, "Vulture".

Spoiler [\(Click to View\)](#)

Step 3.) Now let's add some effects. I'm changing the color of the text to red.

Now I'm adding a drop shadow.
(You can edit this as you please.)

Spoiler [\(Click to View\)](#)

Now I'm adding an inner glow.
(You may also edit this as you please.)

Spoiler [\(Click to View\)](#)

Now I added a touch of gradient. To give a little shine.

Spoiler [\(Click to View\)](#)

Last touch will be a stroke, this will be your secondary color.

Spoiler [\(Click to View\)](#)

Step 4.) Now were going to add a 3D effect. Duplicate the text, then shift it up just a tad bit to give it the effect.

Spoiler [\(Click to View\)](#)

Step 5.) Now let's add some secondary text. I prefer using Scriptina Pro. Look it up on Dafont.com.

I chose "The One and Only"

Spoiler [\(Click to View\)](#)

Step 6.) Now let's add some background effects to top it off.

Spoiler ([Click to View](#))

Step 7.) You don't need to do this, but I choose to. Let's add some texture to the text.

Drag your texture into Photoshop and place it over the top layer of text. Right click on the layer, and click "Create Clipping Mask".

Next, change the layer type to "Overlay".

Now you will have a nice texture overlay.

Final Product.

Other Sig's I've made with this effect.

Cool tutorial and stuff, whatever lol.

Hopefully people will use it.

I-R-IXNAY - August 6, 2012, 11:27 pm

Very nice, ill be sure to remember this for my sig :D

Ove?lo?d - August 7, 2012, 12:17 am

Really nice TuT! I'm going to use this soon <3

Albedo - August 7, 2012, 10:25 am

Cool tutorial brochacho, I'll remember this.

iNach0z - August 7, 2012, 9:11 pm

Thanks, looks very good! Ill be using this :D

CS_PLUTO - August 8, 2012, 12:48 pm

Anybody know the font?

I would like to use it.

The font is BM rizer A6, took me a little while to find it but I did! ?

Ne?ro? - August 9, 2012, 3:10 pm

SO THIS IS WHERE PEOPLE ARE GETTING THESE SIGS.
Thank god.

I've been looking for this for awhile.
They look great.
Thank-you!!

Edit; just finished making my own.

I don't think it is BM rizer A6, here look at this <http://fontzone.net/font-details/BM+rizer+A6/> Look at the capital V on vultures and then on the font list thing, you can see it is different

Very nice tutorial buddy, love the outcome.
Thank you and keep it up. ;)

AmlRight - August 14, 2012, 11:44 pm

cool tutorial. Book marked on to my browser! nice work my friend!

The Network - August 15, 2012, 4:06 pm

Very helpful and interesting tutorial. I always struggled with getting right proportions.

Rin™ - August 15, 2012, 9:09 pm

Nice tutorial very high quality very impressive

MW3GB - August 18, 2012, 6:53 am

Great Tutorial! Will share to my businessmen for sure for practical purposes!

The Hellblazer - August 18, 2012, 7:47 am

Really cool and useful, where did you get that smoke to use as background for the text?

Wasteman16 - September 16, 2012, 12:44 pm

Awesome Tut , Made an Awesome Sig :)

Dylaniscool345 - September 16, 2012, 5:57 pm

Wow. He STOLE this tutorial from SOMEONE else. Vulture from HF made this, NOT HIM! DON'T GIVE HIM CREDIT!!!

success = true - September 16, 2012, 7:02 pm

Awesome, I'm relatively new to GFX and hope to learn a bit more about it, this sure is going to help me create signatures. Thanks!

#AfterDark - September 17, 2012, 11:18 am

very nice tutorial! Just installed Photoshop again (been about 2 years i havent touched it) and was able to create it within seconds and very easy to read tutorial.

I like the ed effect and how easy you showed how to do it. thanks alot m8

F4llenDimension - September 18, 2012, 11:53 am

What are you using, I don't think it was said in the post, or I may be blind. :P

BanTeR - September 19, 2012, 8:02 am

Amazing bro :) looks very nice sig looking forward to more from you.

Mahdy - November 30, 2012, 4:14 pm

Two questions:

1 - I got lost on the background effect. Also, what type of font did you use in the very beginning? I don't know of any good ones, which is why mine is not so good ;3. Great tutorial though, still trying to do the background effect + find the "clipping mask"

2- Where do you upload your images to? And do you save them as a JPG?

This is what I currently have:

GSX-R - December 4, 2012, 2:33 am

I will try this tut today and post my output then.

Thanks for tutorial. (:

Mumble - December 5, 2012, 8:52 am

Sexy signature tutorial :D Thank for this man.

StyxWorld - December 6, 2012, 6:44 am

Simple but nice. Thanks for this tut :)

Offline® - December 7, 2012, 9:35 am

Thankyou for your awesome guide. I have never used Photoshop, ever.
This is what the result was after customizing abit myself after maybe.. 1 hour or so.

I appreciate your help, mate.

Rate on the one I've made for my first time ever /10?

Issvor - December 17, 2012, 4:21 pm

Note a fan of your font choice, but amazing tut!

+Affinity - December 17, 2012, 4:43 pm

Very nice tutorial! I'll be making one as soon as my L33T purchase goes through! Heheh :3
