Nice tutorial for beginners in graphics. It's a simple and easy to follow tutorial that will help people out a lot, if they were looking to make like one of those hipster, nebula signatures.

Stop wasting your time and make something useful instead of these short dumb tutorials. I still don't know how you got into "Graphic Masters"

How bout you hop off this thread dude. At lease BME is contributing something useful, and it already apparently helped at least one person. Why don't you post a decent tutorial, and fyi, Graphic Masters isn't about the tutorials really, it's about the finished products, and from what I've seen, BME is one of the better graphic artists on the site. So before you flame people, why don't you think first.

I didn't even see the -rep until after I posted, then I realized what got him so upset. Either way, as I said before, nice work, and I like your portfolio.
