[RDCA](#): I am sure they will be happy. So before we get into HF related things, I have to ask how is Spain? Do you enjoy it a lot?

[Nickelodeon](#): I didn't know it would be so great actually, It's warm and great has a lot of beautiful nature

[RDCA](#): I always wanted to travel, I hope you enjoyed yourself. In a very short period of time, you have donated a lot of money to HF, which is perfectly fine. Though, do you think people have looked at you differently, or treated you differently because of it?

[Nickelodeon](#): I am still donating even the fact that I got all the donation awards.

Yes, I guess people trust me more, they offer to go first in any deals without asking for it.

[RDCA](#): Well, that shows shows the real reason you were donating. What are some of your favorite things to do on the Internet, and in real life?

[Nickelodeon](#): I love playing games, chatting with friends, and surfing at HF on the internet. I like hanging out with friends, being with family, sporting, and watching TV.

[RDCA](#): If, you could change one thing about HF, what would it be? If you could change one thing about the world what would it be?

[Nickelodeon](#): I would reopen the Human Manipulation and Social Engineering subforum.

Well, this changes from the period, but currently I would make an end to the war in Syria.

[img]<http://i.minus.com/jl0EswX4V4jJf.png>[/img] Strong Quakes Alarm Iran

Earthquakes are not out of the norm by any means, especially in Iran. But in the small city of Tehran, Iran, a 6.4 magnitude earthquake (the first one) hit at 4:53 p.m. Just 11 minutes after the horrific quake, another one hit just 30 miles northeast, this time with a magnitude of 6.3. So far authorities predicted there to be a total of 17 aftershocks. It has also been stated that at least 250 people were killed and nearly 2,000 others injured. Many people are suffering from lack of food and water from these disastrous quakes. Authorities have also sent out rescue teams in the area.

Olympics

The Olympics is quite an outstanding view of our worlds goals and accomplishments. It is currently Day 15 for our fellow Olympians and it's a bit hard not to notice the USA. Micheal Phelps has literally set an overall Olympic record for receiving the most gold medals. EIGHTEEN! USA is currently in first, followed by China, and right behind China is Russia. We'll see how it plays out! Day 16, here we come!

Gay Chick-Fil-A?

Chick-Fil-A is a well known food chain that is notorious for its chicken sandwiches. Well, recently they have been a main supporter of the whole "Anti-Gay" movement. Last Wednesday they held an event known as, "Chick-Fil-A Appreciation Day." The is pretty much an event that hates on gays. In fact, a gay 24 year-old that has been working at the North Carolina Chick-Fil-A for years now calls it, "Hater appreciation day." Kind of makes sense....

[img]<http://i.minus.com/jbnJDqXKVJiOjS.png>[/img] Google

On the Google's blog, Google has outlined a new antipiracy scheme that would penalize the sites which contains more copyright flags. Google said that these sites will be lowered in search rankings. With this scheme invented, Copyright owners have flagged more than 4.3 million sites in just 30 days. "We will begin taking into account a new signal in our rankings: the number of valid copyright removal notices we receive for any given site," Google's blog.

Apple

Recently, iDevice users have been facing problems with logging onto their Gmail. Users have been receiving an error message "mail service imap.gmail.com is not responding" when trying to login. Fortunately, Google has been made aware of this issue and is working to fix it. Meanwhile, iPhone 5's battery photo got leaked and it has been said that it'll have a capacity of 1440 mAh, which is higher than the iPhone 4S' and iPhone 4's battery.

Microsoft

Microsoft has decided to switch to the name from "Windows 8" to "Metro," with it's European partner. So this is how it'll go, "Windows 8 app" to "Metro app", "Windows 8 design" to "Metro

Design" and so on. Microsoft said that "Metro is our design language. We call it Metro because it's modern and clean. It's fast and in motion. It's about content and typography. And it's entirely authentic.

Battle.net

Blizzard Entertainment's (Company behind World Of Warcraft and Diablo) internal security was compromised last week and the hackers have taken non-china battle.net's players' emails. However, the company said that their cryptography method is very tough and unique so that the hackers can't crack them so easily. They urged the other users to change their passwords immediately. In addition, the company has also added a security question, mobile checking, and also dial-in authentication to tighten the security.

[img]http://i.minus.com/jKQ5rwMHo9quw.png[/img] This is basically my own little corner to type up my thoughts and some standpoints on different topics. There's something really interesting about how the United States of America and China view the Olympics. With these two, anything below a gold medal is a loss. While other countries, are ecstatic to place at all, and support their athletes no matter what. We've (USA) come to expect the best from our athletes, and don't accept anything less. We really should be glad that the best the world has to offer, are all together in one place. They are better than almost anyone judging them, yet they judge them with a grain of salt. Ridiculous, in my opinion.

"What do you think of the two new groups?"

"The two new groups really show how HF is expanding and becoming more profitable.

The two new groups will provide new opportunities for people, alongside a more structured system that Omni has worked tirelessly at. The new groups also provide us with an idea of what the community is becoming - stronger! "

[-McDork](#)

"Honestly, I see them crumbling down. It may sound arrogant, but when you think about it, they're all copying off of another group. The Creed at the moment has no public reason behind it besides the fact that they are a "brotherhood that stays behind for

everyone!" Yet that doesn't make any sense as to why it is an official group? They claim to be an original group that will help other members, but the last I heard that was already done by a handful of other groups. The Empire on the other hand, is an all-around group. It's getting too general and is really making a fool out of itself. To no offense out of the both groups, but they seem like they are blindly walking through a forest; no cause or idea."

[-AlbinoShadow](#)

"Both of the two new groups, despite looking good, don't really seem to have much purpose. I feel like the owners of each of the groups bought them simply so they could say they had a group."

[-Brock Obama](#)

"I think two new groups at once is a big thing for HF and will open up opportunities for people who don't have the skills needed for current groups, like Graphics Masters or Reviewers."

Seeing as the leaders of the groups are trusted members around HF, it looks to be both exciting and a refreshing change to the usual mundane mood in some subforums."

[-Daring Do](#)

The topic for next week is "What do you think of the Olympics?"

To send in your entries for the next edition, PM [Sir](#).

Strong Quakes Alarm Iran

Earthquakes are not out of the norm by any means, especially in Iran. But in the small city of Tehran, Iran, a 6.4 magnitude earthquake (the first one) hit at 4:53 p.m. Just 11 minutes after the horrific quake, another one hit just 30 miles northeast, this time with a magnitude of 6.3. So far authorities predicted there to be a total of 17 aftershocks. It has also been stated that at least 250 people were killed and nearly 2,000 others injured. Many people are suffering from lack of food and water from these disastrous quakes. Authorities have also sent out rescue teams in the area.

Olympics

The Olympics is quite an outstanding view of our world's goals and accomplishments. It is currently Day 15 for our fellow Olympians and it's a bit hard not to notice the USA. Michael Phelps has literally set an overall Olympic record for receiving the most gold medals. EIGHTEEN! USA is currently in first, followed by China, and right behind China is Russia. We'll see how it plays out! Day 16, here we come!

Gay Chick-Fill-A?

Chick-Fil-A is a well-known food chain that is notorious for its chicken sandwiches. Well, recently they have been a main supporter of the whole "Anti-Gay" movement. Last Wednesday they held an event known as, "Chick-Fil-A Appreciation Day." This is pretty much an event that hates on gays. In fact, a gay 24 year-old that has been working at the North Carolina Chick-Fil-A for years now calls it, "Hater appreciation day." Kind of makes sense....

Google

On the Google's blog, Google has outlined a new antipiracy scheme that would penalize the sites which contains more copyright flags. Google said that these sites will be lowered in search rankings. With this scheme invented, Copyright owners have flagged more than 4.3 million sites in just 30 days. "We will begin taking into account a new signal in our rankings: the number of valid copyright removal notices we receive for any given site," Google's blog.

Apple

Recently, iDevice users have been facing problems with logging onto their Gmail. Users have been receiving an error message "mail service imap.gmail.com is not responding" when trying to login. Fortunately, Google has been made aware of this issue and is working to fix it. Meanwhile, iPhone 5's battery photo got leaked and it has been said that it'll have a capacity of 1440 mAh, which is higher than the iPhone 4S' and iPhone 4's battery.

Microsoft

Microsoft has decided to switch to the name from "Windows 8" to "Metro," with its European partner. So this is how it'll go, "Metro Style app" to "Windows 8 app", "Metro design" to "Windows 8 design" and so on. Microsoft said, "Metro is our design language. We call it Metro because it's

modern and clean. It's fast and in motion. It's about content and typography. And it's entirely authentic."

Battle.net

Blizzard Entertainment's (Company behind World Of War craft and Diablo) internal security was compromised last week and the hackers have taken non-china battle.net's players' emails. However, the company said that their cryptography method is very tough and unique so that the hackers can't crack them so easily. They urged the other users to change their passwords immediately. In addition, the company has also added a security question, mobile checking, and also dial-in authentication to tighten the security.

Nicki Minaj's Free NYC Show Set For Aug. 14

Nicki Minaj is doing something for her fans by performing a free show. She is doing this because she did not perform at the Hot 97 Summer Jam in June. The free concert will be at the Roseland Ballroom on Aug. 14th and will be sponsored by Pepsi. This is the same day that Nicki Minaj will be on the Today Show. The first 1,500 fans to line up outside the venue after 12:00 p.m. will be granted free admission to the show. Pepsi is also going to provide a live online stream of Nicki Minaj's show.

This is basically my own little corner to type up my thoughts and some standpoints on different topics. There's something really interesting about how the United States of America and China view the Olympics. With these two, anything below a gold medal is a loss. While other countries, are ecstatic to place at all, and support their athletes no matter what. We've (USA) come to expect the best from our athletes, and don't accept anything less. We really should be glad that the best the world has to offer are all together in one place. They are better than almost anyone judging them, yet they judge them with a grain of salt. Ridiculous, in my opinion

The rest is fine.

But I corrected a lot.

I was absent for the last edition also, so I'll leave my opinions on both.

For those of you who are unaware, I am an interviewer, and I did my last weeks interview and this editions interview in advance due to vacation. They were both used in last edition, so yeah.

Last edition:

User News - Big tick as usual.

Interviews - :3

Gaming News - Very interesting. Great job again MarkMare.

Graphics - Amazing.

Rest - Decent, good updates for me.

This edition:

Pretty decent. Nothing notable to mention. This is a balance between it being relatively average, yet still quite entertaining, and me being tired out of my mind.

@Bay: What happened to my music video you said was gonna be in the news? :(

Nice edition, although the World News section looked more like commentary. The whole section was written informally and although I am a supporter of gay rights, Chick-Fil-A was not the one who actually held the event. It was some event anti-gays made themselves. Chick-Fil-A never endorsed it.
