Thread: [\[tut\]HOW TO MAKE trojan almost FUD easly \[tut\]](#)

Breakbot - February 17, 2010, 5:19 pm

Quote:new 2012 EDIT : hey there everyone , i've found new methods of making your servers undetectable (UD) of 90% , i'm making this pole to see how many people are interessted in this :) feel free to Vote

thank's a lot

hello everyone

nowadays crypting trojan don't give a good result if you use use a public crypter , otherwise you need to buy a private edition or to hex it .

so here's a little tip to how make it almost FUD .

we gonna need a (Privacy Protection Software)
this kind of softwares is used by programs creators to protect their creation from cracking and reverse engineering . we gonna do the same to a trojan and you are going to see the result ?

first of alll you need to download the program : PC guard for win32
google is your friend ?

let's start :

server's location ->

[img]http://img94.imageshack.us/img94/8449/29726338.jpg[/img]

then -> general

[img]http://img706.imageshack.us/img706/5905/91158931.jpg[/img]

Security & Encryption

[img]http://img141.imageshack.us/img141/351/50217601.jpg[/img]

Protection Method

[img]http://img707.imageshack.us/img707/8194/47781258.jpg[/img]

and we are done ! ?

results :

poison ivy server :

[img]http://img30.imageshack.us/img30/2347/scnnp.jpg[/img]

bifrost server :

[img]http://img13.imageshack.us/img13/6002/scanno.jpg[/img]

hope it works for you guys

?

any questions ? Pm me and i will answer you as soon as i can .

PS :SORRY I'm not used to speak english .

Mar0x - February 17, 2010, 6:11 pm

Nice tutorial. I just tried it on a CyberGate server and it got detected by 3 of out 19 Anti-viruses.
The only down side was that a notification popped up stating it had been protected by the demo version.

Falconidae - February 17, 2010, 6:13 pm

Very nice tutorial! I shall be using this method.

Mr Evil Chaos - February 17, 2010, 6:24 pm

PS : i didn't say that it going to be FUD but almost fud xD

Charity - February 17, 2010, 6:45 pm

Good + original tutorial. Have seen a couple like this but this has new stuff, so it's good, IMO.

Breakbot - February 17, 2010, 6:51 pm

Quote: Nice tutorial. I just tried it on a CyberGate server and it got detected by 3 of out 19 Anti-viruses.

The only down side was that a notification popped up stating it had been protected by the demo version.

then you gotta find a full version ?

Quote:Very nice tutorial! I shall be using this method.

thanks

Quote:Looks Intersesting. Will have to go through It before making any conclusive comments.
Thanks for the share :)

please tell me what the result is ?

Quote:ood + original tutorial. Have seen a couple like this but this has new stuff, so it's good, IMO.

you're welcome . ?

Mr Evil Chaos - February 17, 2010, 7:12 pm

i know it aint FUD but im guessing the FUD will but in the full one

Black Hat Jack - February 17, 2010, 7:16 pm

This has been known for a while. but thanks for the share. its great for some people that cant afford a great crypter!

and btw. @ casarat; dont use that scanner any more. it spreads like mad to anti virus corps. if you want it to stay slightly UD long. only. and i mean only scan with "no virus thanks", and make SURE "do not distribute samples" is checked.

Neroxan - February 17, 2010, 7:16 pm

(Feb 17, 2010 08:12 PM)cm31 Wrote: [CITE](#) i know it aint FUD but im guessing the FUD will but in the full one

Keep guessing. Protection software is often found as viruses because they are used on legit and malicious applications.

Themida shows as virus if you compile a clean project and protect it with it, this is no different.

However I do have a private protection software that Im gonna try with this now.

Nice to see the guide in english instead of having to translate it, thanks?

Breakbot - February 18, 2010, 9:21 am

Quote:and btw. @ casarat; dont use that scanner any more. it spreads like mad to anti virus corps. if you want it to stay slightly UD long. only. and i mean only scan with "no virus thanks", and make SURE "do not distribute samples" is checked.

Code yeah i know , thanks anyways ?

Gino90 - February 18, 2010, 9:34 am

Well this has been known for a while but great tut dud, and also the crypted file will run only about 20 times in the demo version. anyway, thanks for sharing buddy.

Breakbot - February 18, 2010, 9:36 am

you're welcome .

i will try to find a full version . and post the RS donwload link.

digger183 - February 18, 2010, 9:51 am

Thanks for the tut, I just dont like the demo thing xD.

Mar0x - February 18, 2010, 10:09 am

(Feb 18, 2010 10:36 AM)casarat Wrote: [\[CITE\]](#) you're welcome .

i will try to find a full version . and post the RS donwload link.

Hopefully you find it, the only one I have found was a password protected zip. I'm trying to brute force it, if it works I'll post a link and a virus scan.

Mar0x - February 18, 2010, 10:10 am

Edit:

The password has to be at least 7 or 8 characters long. Even if it is 7, it will take all week to brute force. Hopefully someone can find the full program.

Breakbot - February 18, 2010, 11:35 am

Quote:Hopefully you find it, the only I have found was a password protected zip. I'm trying to brute force it, if it works I'll post a link and a virus scan.

ok man , thanks ?

thanks man i will try this

- **KG** - February 24, 2010, 9:29 am

ahhh thanks for sharing nice tut:)

Ashy - February 24, 2010, 10:13 am

to make it so dr.web cant find your virus just change the icon after youve crypted it with an icon changer

almaalma - February 26, 2010, 12:58 am

nice tutorial

thanks man

Breakbot - February 26, 2010, 7:19 am

you're welcome
thanks for your comments

crackandhack - February 26, 2010, 7:27 am

can i do this with cerberus trojan? :D btw. AMAZING!!!!!!!!!!

eXeSoul™ - February 26, 2010, 9:37 am

Nice tut.!! where is downloading link ? :-O

- Legend - - February 27, 2010, 8:51 am

Man this is dangerous!

I make my server fud with the program and I use it on my other pc.

This opens a lot of windows as "NO MORE RUNS LEFT!!!"... what can i do?

Breakbot - February 27, 2010, 11:43 am

Quote:can i do this with cerberus trojan? :D btw. AMAZING!!!!!!!!!!

i don't know ? but it' works 100% with bifrost and poison ivy

Quote:Nice tut.!! where is downloading link ? :-O

no , no download link for da moment

you gotta find it by yourself ?

souhil5 - March 5, 2010, 6:36 am

i have buy a full version of pc-guard win 32 single licence : poison ,birost FUD?

flAmingw0rm - March 5, 2010, 7:32 am

Great tutorial, I might try this soon! :)

Breakbot - March 5, 2010, 4:56 pm

Quote:i have buy a full version of pc-guard win 32 single licence : poison ,birost FUDYeye

then why don't you give it to other hackers so they can enjoy FUD trojans?

souhil5 - March 8, 2010, 1:02 pm

bc its unique licence c'ant do it in ather computer

Breakbot - March 8, 2010, 4:23 pm

" bc its unique licence c'ant do it in ather computer "

ok enjoy it bro :D

Sh!rak! - March 8, 2010, 5:28 pm

i don't know if someone tried it, but u can do it with a crypted .exe too Oo

cuz i used Fly crypter (5 detections) and then i used this program.

The Result: 1 detection and the .exe is still working

so really nice man ;)

it would be the best way of spreading with a lincensed version

Breakbot - March 11, 2010, 11:27 am

thanks , yeah i know licensed versions are always the best
but i tried to find a full one and i didnt find it

Breakbot - May 23, 2010, 4:59 pm

guys look at my new tutorial .

2short

Suicidal Thoughts - May 28, 2010, 6:17 am

Nice tut man thnx.

I might try this out 1 time and use a normal crypter to do then rest of the job.

alanrl05 - May 28, 2010, 8:28 am

good tutorial going to give it a try

Bakedman - May 28, 2010, 9:18 am

very nice tut i may have to give this a try i just got icrypt 4.1 though =D

wahbiang - May 28, 2010, 2:47 pm

so this is almost useless because theres no crack for the full version :(
unless u buy it ofcos

davd-secure - May 28, 2010, 3:12 pm

thx for the nice tut! :)

Maybe be it would be possible to buy it and let it work on a server for all. :D

legend2memba - May 28, 2010, 4:37 pm

Toxic has a tutorial similar to this. This method is becoming more known I see.

wahbiang - May 28, 2010, 5:28 pm

yea but sadly's toxic's .net reactor doesnt work for me :(

Shqiptari91 - May 29, 2010, 1:37 am

This used to be 100% undetected but when you scan it on the internet it will get detected as soon as possible.

mKn1ght - May 29, 2010, 1:39 am

Epic tutorial, thank you.

I will try it out later.

Breakbot - June 4, 2010, 5:10 am

glad to see that my tutorial is helping you guys .

try avoid scanning the file in jotti, and virus total .

MainHacker - June 4, 2010, 6:53 am

lemme read :| .. anyways thx ;) .. will surely see to this one :D

Breakbot - June 6, 2010, 4:36 pm

sure

you're welcome

casarat

JAM - June 6, 2010, 5:04 pm

There's Also More ways to make your thing Fud Bind it to something Add A Icon work on H x D and Mess around with the Hex Values

Just by doing that I had 9 on 19 Come to Detection rate: 5 on 19 (26%)

and play with the hex values to make it 1 or maybe 2/19?

Elite Hacker 69 - June 21, 2010, 6:46 pm

truecrypt and/or the .net reactor serves the same purpose. nice tut.

thunder - June 21, 2010, 6:56 pm

Wow thanks a lot, it covers many AV, at least the most popular which is good

6010fd12 - June 21, 2010, 9:24 pm

im getting a "microsoft .NET executables are not supported in Win32 version"... um nvm while i was writing the error i figured out what i was supposed to do.

But I sent them an email to send me demo of pc guard for .net and still no reply =/

unique12 - June 22, 2010, 4:22 am

I am using windows 7 it is giving an error not supported in .net framwork.The File was crypted but the result was same any problem.everything u do i followed but the result didnt changed. i am using of emmisarry keylogger

microsoft .net exectubles are not supported in win32 version.Pc gaurd for .net supports both

standard win 32 and microsoft .net application.Plz visit our hompage. this is the error i am getting
crypting emissary server.USing windows 7

Breakbot - June 22, 2010, 5:49 am

didn't tried it in a sev7n i use only XP . try to put the latest version of frameworks

6010fd12 - June 22, 2010, 6:07 am

Sir did you even read my post above yours?

The Name's Bing - June 22, 2010, 12:13 pm

Is that a site or a program that you use for the scanners?

Cool tut btw :)

Breakbot - June 22, 2010, 5:44 pm

(Jun 22, 2010 12:13 PM)Hurley Wrote: [\[CITE\]](#) Is that a site or a program that you use for the scanners?

Cool tut btw :)

No it's a website

in case you want to test it , here's the website :

Quote:<http://virusscan.jotti.org>

casarat?

syed468 - June 22, 2010, 9:09 pm

awesome tut :D .. needed sometime like this :D

aN^ - June 23, 2010, 4:06 am

Very nice man.

tahnx.

Edit: Works on rat?

NigSup - June 23, 2010, 4:15 am

Nice Tut for people who arn't able to obtain a crypter. Thanks mate

hacker_10101 - June 23, 2010, 11:41 am

Nice tutorial. I just tried it on a CyberGate server and it got detected by 3 of out 19 Anti-viruses.

Breakbot - June 23, 2010, 12:16 pm

glad that my tut is actually helping you

@AN^

yes it works with all rats , stealers , keylogger

V1P3R - June 24, 2010, 7:38 am

thanks for the share but does it works or keyloggers too ?

Edit: i just saw you post where you said it works on every thing :D

thanks again m8

Rusted Platinum - June 24, 2010, 8:07 am

I find it very charming

Edit : I never saw a unique methord like this

U can try selling a book containing these methords ?

DreamH4X - June 24, 2010, 2:11 pm

I dont mean to be an a\$\$ but this tutorial is a litle hard to follow :(

youngthug - June 24, 2010, 3:04 pm

Does it work with turkojan?

Vladimir_332 - June 24, 2010, 8:08 pm

Dude I'd rep you if I could, you deserve it especially for showing this XD

Lukec12 - June 24, 2010, 8:49 pm

Not bad idea. Thank you.

too short

!!!! - June 24, 2010, 9:59 pm

Errr...!

I would better use a crypter to this as it isnt 100% FUD.

Thanks anyway :D

Breakbot - June 25, 2010, 10:42 am

(Jun 24, 2010 02:11 PM)DreamH4X Wrote: [\[CITE\]](#) I dont mean to be an a\$\$ but this tutorial is a litle hard to follow :(

lol dude it's one on the easiest way to protect xD

good luck , if you need help pm me

and yes guys it works with evrything

rats stealers keyloger

casarat

LiquidNrg - June 26, 2010, 9:35 am

i just want to ask one question how many days its remaining FUD server???

Prank Calling - June 26, 2010, 10:08 am

Very Good Pictured Tutorial i am going to try this method.

Rusted Platinum - June 26, 2010, 10:31 am

We can use a crypter Instead..?

Dio. - June 26, 2010, 11:45 am

anything to crack pc guard >??

cause the protected program can run only 20 times

VorTeX32™ - June 26, 2010, 12:24 pm

or just use a crypter lol buy one or u se a public one ... but public one get detected VERY fast

Breakbot - June 27, 2010, 6:00 am

vortex the point of this thread is to protect files when you don't have money to buy a crypter lol public crypters doesn't stay FUD not even 24hours .

@ rusted same answer :D

Fallenbot - July 3, 2010, 1:39 am

i cant find it on google >.>

Anyone can pm me a link?
thanks.

Breakbot - July 3, 2010, 2:05 pm

here you go :

from the official website : <http://www.sofpro.com/files/demo/pcgw32d.exe>

PinkyPinky - July 3, 2010, 2:09 pm

Would be nice if you can find some method to make it fud, btw is this scan/run time ?

Prank Calling - July 3, 2010, 2:52 pm

Nice Tutorial man keep up the good work.

Breakbot - July 4, 2010, 5:19 am

i think is both ,and if you wanna make it FUD just crypt it with a public crypter make it 5 or 6 detections then protect the crypted file :D

azerty39 - July 6, 2010, 1:40 am

I have test and I have 6/16 now :/

Spiritism - July 6, 2010, 2:02 am

Nice tut dude.,.,.,. too short :\

Breakbot - July 6, 2010, 7:20 am

as i said in my last comment , try this method on a wsorking crypted server . result will be 0/18 or 1 maximum

azerty39 - July 6, 2010, 1:51 pm

(Jul 6, 2010 07:20 AM)casarat Wrote: [\[CITE\]](#) as i said in my last comment , try this method on a wsorking crypted server . result will be 0/18 or 1 maximum

Yes this is the good method ?

You crypt your server and you protect him, and you have 0/16

Thanks for the tips :)

Fallenbot - July 9, 2010, 7:09 am

Nevermind ,my bad i found it :P !!

Thanks for your tut.

FYH43 - July 10, 2010, 7:33 am

thanks for the tut..i think it works but i dont tested it..i crypt it with a public crypter and got 0/16 and now i done everything from your tut but i got a warning that it will work just for the first 20runs..do you know something about it?

Breakbot - July 11, 2010, 2:59 pm

that means it will run only 20 times . why ? cuz it's a demo

you need to buy a license

FYH43 - July 12, 2010, 12:48 pm

okay thanks mate?

[EPIC] LOL [EPIC] - July 12, 2010, 1:56 pm

Wow that is pretty impressive to be honest.

Good job on this original tutorial.

Gu5 - July 12, 2010, 1:56 pm

Great tutorial, thanks for that.

Zubb - July 12, 2010, 3:56 pm

All the high company packers are the same.

It makes it Undetectable but none of the victims can actually run the file.

Someone needs to crack it, which would be pretty hard as I bet it has a strong algorythm.

Overall. Nice work.

Valour - July 12, 2010, 9:21 pm

Hey casarat why not provide the link to the full version because i wasn't able to find a working link with crack on google, still my search is on so if i find i will edit this post but please man , it would have been better if you would have posted a link

Breakbot - July 13, 2010, 7:09 pm

thanks for your comments :)

i can't give you a full one , i'm not a cracker . and i think that you can't find a FULL VERSION (cuz it's a kind of a anti cracking software , know what i mean :D) .

dont download anything ,

Computer - July 13, 2010, 7:17 pm

t

Breakbot - July 14, 2010, 8:48 am

you're welcome ?

7,515 views , not bad :D

analmensch - July 15, 2010, 4:22 am

do you think that's a method which hold longer than two months?

Breakbot - July 15, 2010, 7:08 am

for me , it stays atleast a month and even more if i send it to only a few persons .

flamereaper - July 19, 2010, 10:03 am

really great tutorial..thankx

Zubb - July 19, 2010, 11:54 am

I hate public packers. Worse than public crypters.

The fact it shows up a demo in a pop up message box just brings suspicion.

I prefer modding.

Nice tutorial though.

Breakbot - July 20, 2010, 1:33 pm

i prefer this one or xenocode to crypters xD

short

Phreak™ - July 20, 2010, 1:35 pm

Nice Man, Good Tut Ill Try This Later.

SKORO - July 20, 2010, 2:57 pm

Im going to use this now. thanks

Breakbot - July 21, 2010, 7:12 am

okey dude ;D

Spoiler ([Click to View](#))1shortcasarat

12KPR - July 21, 2010, 7:30 am

Thanks mate :] nice tut its working perfectly

Dumbo - July 21, 2010, 8:59 am

thanks casarat , will use this method for my next mission :)

jojobadejoh - July 21, 2010, 9:26 am

thanx man I m going to try tomorrow

very interesting

thanx

Smylie2 - July 21, 2010, 11:49 pm

Thanks to you.

Just "almost" FUD :D

Breakbot - July 22, 2010, 7:40 am

YES , not going to say FUD but UD xD

ps : are you from morocco ?

Does anybody have the Serial key for this appz?

Jisatsu - July 25, 2010, 9:21 pm

You misspelled easily. Could you fix that?

Baldr - July 26, 2010, 5:21 am

I tried it with my Cybergate server. I done the new file and i scanned it with Avast anti-virus. Virus scanner havent found virus, but when I'm trying to run the .exe file there is an error message: (error:00B7) Cannot create a file when that file alredy exists.

I closed every program but the erros message is still there...
What can I do? Please write me PM.

Breakbot - July 26, 2010, 1:21 pm

(Jul 25, 2010 09:21 PM)sickOMNIskillz Wrote: [\[CITE\]](#) You misspelled easily. Could you fix that?
my bad ,
thank you ?

--

dude test it again , i don't know maybe the crypter you use don't work with that method

Sarajevo92 - July 26, 2010, 2:00 pm

I SO LOVE YOU ! U ARE MY HERO ! MADE 1/16, JUST Comodo ! :D:D

<3333

lidoboy - August 4, 2010, 10:41 am

This done nothing for my Spy-Net 2.6 server, got 16/16 on NoVirusThanks scanner. Shame.

Schizoid™ - August 4, 2010, 10:44 am

Hmmm... This isnt so good...WHy would i need stuff who is 4/19 ud?? any pub crypter is atleast 1/19

johnyindo - August 4, 2010, 2:38 pm

Maybe i should to try it...

d4rk c0d3r - August 4, 2010, 4:58 pm

thanks for sharing , < msg too short >

Breakbot - August 6, 2010, 5:28 pm

schizoid , go use your public crypter . public crypters can""t stay UD for even 1 week bro .

Fallenbot - August 9, 2010, 7:19 am

Hmm will this app make it fud runtime?
Or only scantime?

or both? :P

Ironside - August 9, 2010, 7:27 am

only went down to 8/16...

Breakbot - August 10, 2010, 10:25 am

barathrum , cuz it become very public :D .

i'll be posting new tutorial soon with better results

Ironside - August 10, 2010, 11:45 am

Yeah probably, someone went scan on VirusTotal and such stuff, anyway can't wait for new tutorial :)

Indian_Warez - August 10, 2010, 12:46 pm

Good original tutorial. Have seen a couple of times like this but this has new stuff, so it's good

Plutonium - August 10, 2010, 1:09 pm

Hello! This tutorial is well documented from the beginning to the end.

Thank you for this!

~ P

Breakbot - August 10, 2010, 6:47 pm

thanks for comments :) any problem? i'm here to give answers for all your questions

[K???TiK]™ - August 11, 2010, 2:11 am

Very nice, will give this a try.

Donkey - August 11, 2010, 2:26 am

was gonna attempt to crack program but if your making a new thread i wont worry, unless that one needs cracking too?

IkoPiko - August 11, 2010, 4:36 am

Very nice will try this later.

Breakbot - August 11, 2010, 9:24 am

in the new tutorial , i will be using softwares that have cracks and can easily be found

[-True-] - August 11, 2010, 10:40 am

thanks, trying this now. hopefully it works for me :D

great tut i just hacked so many ppl

Breakbot - August 31, 2010, 8:41 pm

thanks .

theres a new tutorial that i've posted PART III

work with evrything . easy and FUD sometimes

iamnotHacker - August 31, 2010, 10:39 pm

nice work thank you man..

adrianno - September 8, 2010, 5:31 pm

(Feb 17, 2010 06:19 PM)casarat Wrote: [\[CITE\]](#) hello everyone

nowadays crypting trojan don't give a good result if you use a public crypter , otherwise you need to buy a private edition or to hex it .

so here's a little tip to how make it almost FUD .

we gonna need a (Privacy Protection Software)
this kind of softwares is used by programs creators to protect their creation from cracking and reverse engineering . we gonna do the same
to a trojan and you are going to see the result ?

first of alll you need to download the program : PC guard for win32
google is your friend ?

let's start :

server's location ->

[img]http://img94.imageshack.us/img94/8449/29726338.jpg[/img]

then -> general

[img]http://img706.imageshack.us/img706/5905/91158931.jpg[/img]

Security & Encryption

[img]http://img141.imageshack.us/img141/351/50217601.jpg[/img]

Protection Method

[img]http://img707.imageshack.us/img707/8194/47781258.jpg[/img]

and we are done ! ?

results :

poison ivy server :

[img]http://img30.imageshack.us/img30/2347/scnnp.jpg[/img]

bifrost server :

[img]http://img13.imageshack.us/img13/6002/scanno.jpg[/img]

hope it works for you guys

?

any questions ? Pm me and i will answer you as soon as i can .

PS :SORRY I'm not used to speak english .

stupid question but what is servers location. what do i put here?

Breakbot - September 8, 2010, 5:41 pm

I Dont answer to someone with 1 post sorry .

HàCk&RmàN - September 8, 2010, 5:44 pm

The RAT Doesn't Work After The Operation . =(

I'm Talking About Bifrost ^_^

Breakbot - September 8, 2010, 6:31 pm

it this one don't work try one of these methods .

<https://hackforums.net/showthread.php?tid=437581>

<https://hackforums.net/showthread.php?tid=636393>

this should work .

needitbadly - September 22, 2010, 1:42 pm

thanks man

u r a life saver

Breakbot - September 23, 2010, 6:02 pm

no problem man !

message casarat

MoonWalker - September 23, 2010, 11:00 pm

Wow nice! Thanks! That's awesome stuff :D

Mint - October 3, 2010, 8:41 am

Thank you for the tut, it worked great. But one thing is that the app is demo version, maybe someone can help to find the crack for it or similar program?

m4lebolgi4 - October 3, 2010, 12:42 pm

pretty nice tutorial. Thanks.

unknowntoall - October 3, 2010, 1:08 pm

That's a good Info .. Thanx ..

DocVen - October 3, 2010, 3:51 pm

Thanks man! It's worth using and it helps those of us trying to learn.

(Sep 8, 2010 05:31 PM)adrianno Wrote: [\[CITE\]](#) stupid question but what is servers location. what do i put here?

Location of the server file you created on your computer. The file you want to encrypt.

NEW KID ON THE BLOCK - October 5, 2010, 10:39 pm

Lol this is the simplest crypting tut ever thanks mate!

Breakbot - October 9, 2010, 2:00 pm

no problem mate

?

iforce - October 13, 2010, 10:18 am

<http://www.sofpro.com/download.htm> link from the PC guard for win32

senddoss - October 13, 2010, 11:47 am

Thanks for the tutorial, it really helps.

nice share ,? but i will fuck to avra?

virusinsystem32 - October 15, 2010, 10:11 pm

good tutorial.. tested on Cerberus it got only detected by 3 AV but the server is not working now :(

mothekunal - October 15, 2010, 11:57 pm

Hopefully this method is still active and I can use it?

Breakbot - October 16, 2010, 5:18 pm

i stopped hacking for a few months now . i can say that it's still working but for the result you have to scan it

Developer - October 16, 2010, 5:35 pm

This is original content on this tutorial, good post.

Tarun123 - October 18, 2010, 2:17 am

fa question does it fud for runtime?? I dnt thik a similar app was xencode couldn't make runtime fud

Breakbot - October 19, 2010, 1:01 pm

i answered this question hundred time before . for Me it's ST and RT . but i dunno for now . you gotta try it to see

Mashimaro - October 23, 2010, 10:50 pm

Hopefully this method is still active and I can use it?
good!!

gokulos - October 23, 2010, 11:33 pm

DOES IT WORK???
coz i hav tried n doesnt work

Sonic Boom - October 24, 2010, 2:29 am

Nice Tutioral!!I'll try it!

wkdw1ll1ams - October 24, 2010, 2:45 am

dark comet rat:

i dunno dude , maybe some assholes start scanning their file and now the Method is detected

omariususa - November 24, 2010, 2:52 am

Amazing Post! Hope to try it soon

woxxy - November 24, 2010, 10:41 am

I have problem because he is not detected but i not receivend information ...

Breakbot - November 24, 2010, 11:27 am

WTF is this ?!

dude i can't understand shit of what you are tryin' to say , please explain more .

omarius - November 25, 2010, 3:53 am

Even though I am having trouble finding this piece of software.... thanks a lot.... it looks really promising.

Selvest - November 25, 2010, 4:35 am

Sweet, will use when I need to crypt :P 3/19 isn't that bad at all.

bcooper606 - November 25, 2010, 10:22 am

i tried this with cybergate server on my other comp when i send it to other comp next to me i get this when i open it. error 00b7) cannot create file when file already exists?

Breakbot - November 25, 2010, 12:14 pm

hmm weird , try with another rat ? or test one of my other tutorials

K!NG OF CHI - November 26, 2010, 12:56 am

Pity that this is so old :-(

But thanks for the TUT

Breakbot - November 26, 2010, 12:32 pm

yes it's old , but it definitely work and worthy !

thanks

SERIOUSP - November 26, 2010, 12:55 pm

worked for me my cerberus rat is now fud but i wonder for how long...

poopykun - November 26, 2010, 12:55 pm

does this work with istead keylogger?

Breakbot - November 26, 2010, 1:02 pm

seriousp : for atleast 1 month that's for sure

poopykum : yes !

Breakbot - November 27, 2010, 2:39 pm

19.229 views ! that's cool !

next time it will be a 100FUD File Video Tutorial

[eno] - November 27, 2010, 5:03 pm

just one infected ?

xarsh - November 27, 2010, 5:42 pm

great tutorial , but does nt this corrupt the server?

Breakbot - November 28, 2010, 3:29 am

not at all .xarsh .

[quote='[eno]' pid='7960518' dateline='1290906189']

just one infected ?

Avira AntiVir 27/11/2010 7.6.0.59 KIT/JMan

if you don't know how to put a picture in a signature , i can show you LOLLOL .

And for the detection . waw only One

walidbj - November 28, 2010, 7:32 am

dont work with nod32 ddoser server

2010-11-28 10:30:42 Real-time file system protection file C:\Users\walidbj\Desktop\bot.exe a variant of Win32/Dewnad.AK worm cleaned by deleting - quarantined

circa30 - November 28, 2010, 7:43 am

seems like a good idea to fud servers.

Breakbot - November 28, 2010, 10:25 am

it works . and i didn't test with a kind of rats ...etc

rickiross - November 28, 2010, 4:44 pm

hey buddy i made a server.exe with Bifrost . and i clicked the same options like u said. but i just donst understand the last pic. with 1 2 and three. can u write how i have to go on. and after that it does not work. thats the baddest shit.

kingfisher - November 28, 2010, 8:28 pm

Nice way to fud .. thx you very much

Breakbot - November 29, 2010, 12:06 am

rickross Use xenocode it's a lot better + aspack to comprress the shit . take alook at my other tytorial

Eshta - November 29, 2010, 5:26 am

Your just great :) thank you man for this post i will use it tooo much that was my proplem

rickiross - December 1, 2010, 12:37 pm

god damn shi""... kaspersky cant find it but . im givin it up. i tryed every method., but Nothing of them worked. even this fuck###ng mole aspack and xenocode. kaspersky saivs its clean but Avira Antivir did find it. and if i start it the server crashes... dont know what to do guys

bcooper606 - December 1, 2010, 12:51 pm

this corrupted my cybergate server.

V137N4m - December 1, 2010, 12:58 pm

thnx dude very nice :D xD ..

BguyTheKing - December 1, 2010, 11:09 pm

Thats a nice tutorial. I really like it.

Dr. A. NonyMouse - December 7, 2010, 8:23 pm

Damn thats a lot of veiws.

Breakbot - December 8, 2010, 6:02 am

yes ! thanks xD

BREAKBOT XX

kaburuan - December 9, 2010, 4:35 am

Nice.. but, I don't know why its not working in me. :(

Breakbot - December 9, 2010, 6:20 am

well can you put more informations , i might help you !

AUTISMUS MAXIMUS - December 20, 2010, 5:45 am

Nice tut im so gonna use this and send it to people i dont like xD

The Unknown - December 21, 2010, 6:35 am

great tut , rate 5 on 5 , keep up the good work and thanks for sharing this

Olsi - December 31, 2010, 9:13 am

Great tutorial. I managed to make my RAT server from 11/16 to 7/16 and still working. Anyway thanks!

The Mad Man - December 31, 2010, 2:08 pm

Nice tutorial thanks for the share!

bornwild - December 31, 2010, 2:17 pm

thanks for sharing, great job

Darthkatzs - December 31, 2010, 2:37 pm

Pretty damn interesting. I'll check it out.

Hopsin - December 31, 2010, 2:52 pm

I'll add this great tool in my collection since it doesn't corrupts the file and it is very effective. Thanks for the tutorial, appreciated!

jocccca - January 1, 2011, 5:52 am

Thanks for the share, it is great tutorial...

African Hat - January 10, 2011, 2:18 am

Thanks going to check this out when I am @ home

African Hat - January 10, 2011, 8:58 am

It's telling that the .NET is not supported?

SoftwareDev - January 10, 2011, 9:09 am

(Jan 10, 2011 09:58 AM)Andrique Wrote: [\[CITE\]](#) It's telling that the .NET is not supported?

Go here <http://www.sofpro.com/feedback.aspx?PCGNETdemo=1>

You have to request a demo.

NOTE: They will only send it to company, so they will probably ask for company email eg
yourname@yourcompany.com

Its annoying I emailed them from my own domain for pc repairs and they won't send it to me :(

Breakbot - January 10, 2011, 9:13 am

thakns for comments guys :)

brekabot

Nort - January 10, 2011, 11:18 am

Good Tutorial!

thank you mate.

Tovnys - January 20, 2011, 12:13 pm

Good tutorial. Will try this tonight. Thanks

seskanda - January 20, 2011, 2:22 pm

Where can u find full version of PC Guard 32?

Smylie2 - January 20, 2011, 5:55 pm

(Feb 18, 2010 11:09 AM)Mar0x Wrote: [\[CITE\]](#) Hopefully you find it, the only one I have found was a password protected zip. I'm trying to brute force it, if it works I'll post a link and a virus scan. If you already got the Zip, please tell me the link ore upload it. I could crack the password within minutes ;)

YaBoiScRiBBLeZ - January 20, 2011, 5:57 pm

Nice Thread Will Help people without crypters.

jeejeepower - January 21, 2011, 5:56 pm

not fud anymore

this tutorial is like 1 year old dude , don't expect the result to be fud

ado11 - *January 22, 2011, 2:47 am*

Thanks for this tutorial

This will help me a lot

Thanks ?

African Hat - *January 22, 2011, 3:17 am*

Thanks, helped this time and dont expect it to be good it's one year old!<3

Sunda - *January 22, 2011, 10:47 pm*

Hey thanks for the share will try on Dark Comet RAT when i get a chance.

jalal77 - *January 28, 2011, 7:08 am*

hey dude it wont giving output file .i guess it will work in full version.any solution???

Breakbot - *January 28, 2011, 7:40 am*

it is giving the output file . :)

uuuuuuyyyzzzz - February 3, 2011, 12:30 pm

thanks man..very nice tutorial

good for those who cant afford to buy crypters

Conch - February 3, 2011, 12:48 pm

Thanks but this is very old.

and it has demo protection XD

Thanks though.

Breakbot - February 3, 2011, 12:54 pm

it's a year old tutorial ^^ so yeah t's pretty old x)

waznyf - February 3, 2011, 1:04 pm

Is PC Guard for Win32 free? It is requesting that I pay money.

Breakbot - February 3, 2011, 1:14 pm

yes because it's not a free application .

Stenography - February 6, 2011, 4:44 am

Can You Give Me Serial Please ?

E.T - February 6, 2011, 5:26 am

Good work, but it's not completely fud :(

Breakbot - February 6, 2011, 5:30 am

i don't have a freaking serial , and it's not completely fud , it's UD

iHacking - February 15, 2011, 5:08 pm

Do you know where i can get the full version free?

andrejsed - February 17, 2011, 4:11 am

Good tutorial.

Will try this. ?

Thanks

endejan - February 20, 2011, 4:27 am

Thanks, very useful tutorial, not even Malwarebytes is able to detect it now, not to mention Avast.

endejan - February 20, 2011, 5:58 am

Doesn't seem to work on my ProRat server, Avast still detects it, any help?

Breakbot - February 20, 2011, 9:20 am

(Feb 20, 2011 06:58 AM)endejan Wrote: [CITE](#) Doesn't seem to work on my ProRat server, Avast still detects it, any help?

lol dude thanks for the laugh , Prorat ? who the hell still use prorot ? lol

[K???TiK]™ - February 20, 2011, 1:58 pm

I tried this with a cybergate server and the result server kept crashing.

AMAVI - February 20, 2011, 5:57 pm

Thanks man it worked i had in the first place like 11 infections detected now it only detects 4.

fcierrek - February 27, 2011, 12:24 am

i was wondering if i can use it on a crypted file :>

Crypted file 4/16 got into 3/16 different ones :)

but it doesn't work,damn...too bad

Boss - February 27, 2011, 12:27 am

i believe we can call this a mass fail?

thanks for share. nice work. keep it up :)

Mr. Panda - February 27, 2011, 5:17 am

Lol this really works!

Kinda old tutorial, but it still works.

First 11/16

after that 4/16

J@bz - February 27, 2011, 8:26 am

hey i'll give this a try thanks

screenbuster - April 1, 2011, 12:48 am

Excellent tutorial. thanks for your share.

anjshtanji - April 1, 2011, 5:23 am

nice thread.i like it.

i will give a try later

tinimo120 - April 1, 2011, 7:14 am

nice tut bro

go ahead

keep it up

but

such things are out of date

zinologger - April 1, 2011, 7:59 am

Hey ThankX ??

5 on 10 :/ theres no nod32 but i guess its not even 25% FUD

hoppinupp - April 18, 2011, 2:59 pm

Thanks for this share, tho it's not FUD, but still good if you don't have a crypter :)

hypotenusan - April 19, 2011, 9:34 am

That's one hell of a nice tutorial! Thanks!?

N3me\$!s - May 3, 2011, 11:16 pm

nice tute....

thanks for posting!!1

Breakbot - May 5, 2011, 4:00 pm

it's a very old Tutorial with +20.000 views , i won't be surprised if the result is less good now

RussianFederation - May 5, 2011, 4:11 pm
Thankyou for your great thread!

yazzy - May 18, 2011, 6:50 pm
simple and easy i will get the full version to do it, thanks

heezyg - May 18, 2011, 6:51 pm
There's no such thing as "almost FUD". It's either FUD, or it's not.

Breakbot - May 19, 2011, 9:42 am

no problemo

enjoy it ?

JackTheCommander - May 24, 2011, 10:17 am

? Thank u dude ?

WayCanBacon - May 25, 2011, 7:08 pm

I get a pop up that says "Microsoft .NET executables are not supported in win32 version. PC Guard for .NET supports both standard win32 and Microsoft .NET applications. Please visit our homepage for more information about PC Guard for .NET"

What's going wrong?

sexynsmartjenny - May 25, 2011, 8:26 pm

this seems really awesome. i will try it out. is there any cracked version of the soft ware so i dont have to buy it?

I am THC - May 25, 2011, 11:54 pm

Thanks for this share, going to try this now :).

S0Rk - May 26, 2011, 1:38 am

Yeah it's not bad :) i have tried and it works my server wasn't fully detected xD

bishothelord - June 1, 2011, 3:14 pm

great TUT :) .. thnx alot

JKE - June 1, 2011, 3:16 pm

Great tutorial, gonna try it when I can portforward correctly, something's wrong.

Breakbot - June 2, 2011, 11:39 am

no problem ! thanks for the commets :)

sotacan - June 22, 2011, 5:02 am

yea great tut thx for posting

nathan ! - June 22, 2011, 5:06 am

It is not working for me it corrupts my server..

Breakbot - June 22, 2011, 5:42 am

give it another shot , follow the instructions

UncleCracker - June 22, 2011, 7:05 am

it doesnt work.

my trojan isnt fud !!!

amin24e - June 22, 2011, 7:51 am

thank you very much for this

scyth3 - June 22, 2011, 9:26 am

looks great, i'll try it later
thanks for sharing it!

greetz scyth3

MakenduOwnage - June 22, 2011, 1:42 pm

Im going to try this and see if it works hopefully it does. Thanks for posting this tutorial

Vabe - June 27, 2011, 5:31 pm

I just need to know, is my .exe file now FUD or is it the file new to my desktop?

Files on Desktop: "p.exe_OLD" } These files cannot be opened (need to browse for a program or search the internet)

"PROTECTION.RPT" }

Please help

Still, Better then other crypters. =D
Still, Better then other crypters. =D

DarkXehanort - July 2, 2011, 10:38 am

Thanks for the share bro ! Will use this in future :)

Imperator - July 28, 2011, 2:18 pm

notification pops up that says the it's protected by the demo version...

tomtom1996 - July 28, 2011, 3:58 pm

Cool method Never heard about it ... I have tried it it is 2/19 Realy good... (before it was 19/19 O.o)

Breakbot - July 31, 2011, 6:48 pm

yeah well it's great to see that it's still working :)

+31.000 views :p

vikrantnegi007 - October 21, 2012, 8:04 am

Nice TUT.

hey i security and encryption step, do we have to tick or untick the "prevent file modification"??

BlackEvil - October 21, 2012, 11:53 am

Great totutrial , i just download it and i will check it later
thanks for posting bro!

lucas15 - October 21, 2012, 12:41 pm

Thank you my friend! I will try this and let you know ;) Good tut

byrnesy8 - October 21, 2012, 12:58 pm

works great :) mine was 11 out of 14 an now its 3 out of 14, thanks alot for this

Justified - October 21, 2012, 1:00 pm

Thanks for taking our time to write this tutorial I'm sure it can help a lot of people out.

own4g3_hey - October 21, 2012, 11:50 pm

Can anyone link me to PC Guard?

Not the demo

hellmouth - October 22, 2012, 12:33 am

great tutorial just downloaded the program but cant get it to zero :-(

uglykidjoes - October 22, 2012, 2:19 am

I will try this later thanks for posting the tutorial

7amndy - October 22, 2012, 9:27 am

Very nice tutorial! I shall be using this method.

PM me plz

uglykidjoes - October 22, 2012, 9:44 am

Will this courrpt darkcomet servers or can anyone confirm it works

Breakbot - October 22, 2012, 9:47 am

It works , it has been working for 2 years now . just try it out

uglykidjoes - October 22, 2012, 9:55 am

Will do thanks for this tutorial bro much appreciated

The Hellblazer - October 22, 2012, 9:57 am

Thanks for the share, worked like a charm, good job OP! :D

Breakbot - October 22, 2012, 9:59 am

no problem:) feel free to check my other tutorial about crypting and protecting files they work too

EBAH - October 22, 2012, 9:59 am

Very good tut man. thanks a lot for this!

samrokzz - October 22, 2012, 10:02 am

Nice tutorial ,

Thanks for the share .

tornmage - October 22, 2012, 4:30 pm

Oh my gosh. Thankyou so much. I don't know what I would have done if I didn't find this tut.

Breakbot - October 22, 2012, 8:41 pm

hey there everyone , i've found new methods of making your servers undetectable (UD) of 90% , i'm making this pole to see how many people are interessted in this :) feel free to Vote

kevinv321 - October 23, 2012, 5:56 am

Thanks, will try it someday soon, :D

uglykidjoes - October 23, 2012, 9:57 am

Voted yes on poll id like to hear about new method

dodo1212 - January 30, 2013, 6:02 am

nice tutorial i love people who help us!

DefinitelyNotACop - January 30, 2013, 9:37 pm

I got a message about the program only running 20 times and then it will no longer be able to be ran...

do I have to get the full version?

FreeBSD - January 31, 2013, 3:57 am

Cool. It works for me! Thanks man! Great tut!

wowusux - January 31, 2013, 6:32 am

Good + original tutorial. Have seen a couple like this but this has new stuff, so it's good, IMO.

AndroZazu - January 31, 2013, 9:28 am

Thanks a lot for this awesome tut's

herrdeutschland - January 31, 2013, 11:06 am

very good tut dude ,thanks for sharing it but i prefer the hexing method ^^

clevon - February 12, 2013, 8:22 pm

Very nice tutorials i will definetly try it out

Dark95 - February 13, 2013, 5:50 am

Doesn't this method get un-FUD with time?

Breakbot - February 13, 2013, 5:52 am

(Feb 13, 2013 06:50 AM)Dark95 Wrote: [\[CITE\]](#) Doesn't this method get un-FUD with time?

it's a free method that was shared years ago so don't really expect that to stay fud for a long time :) it's just a temporary solution

King Cairo - February 14, 2013, 7:11 pm

Does this still work?

Best Regards,

-King Cairo

abodlanyer - February 17, 2013, 11:22 pm

Is it only good for scantime?

35 char

babouin - February 18, 2013, 7:45 am

by which antivirus it is detected, and which encryption software must be purchased to it fud or if someone make me it?

MBD_f0rest - February 26, 2013, 1:42 pm

Thank you a lot it helped me very much! Thanks again! :)

?????????? - February 26, 2013, 1:47 pm

(Feb 26, 2013 02:42 PM)MBD_f0rest Wrote: [\[CITE\]](#) Thank you a lot it helped me very much! Thanks again! :)

Rly ??

Look at OP date, it is over 3 years old ?

FytALitY

Bangman22 - February 26, 2013, 5:50 pm

Looks interesting. Will be giving it a try once i have some time.

black-rane - March 4, 2013, 9:22 pm

thanks bro its good to help us noobs

Breakbot - October 7, 2013, 1:18 pm

hey there everyone ! it's been quite some time now , i'm back and i'll be posting a new tutorial soon , (hopefully these days) and it's clean !

#R00T~ - *October 7, 2013, 1:43 pm*

Great tutorial OP, thanks for sharing!<3

NoCheatBypass - *October 8, 2013, 8:07 am*

im interested on this :D ? ? ?

busileonardo - *January 19, 2014, 7:39 am*

Very interesting.. Im gonna try it Thanks a lot

stylo_asif - *January 19, 2014, 10:50 am*

Yes Bro Personally i Check And try It Working Fine If you Have full version trail Version Not Working On It by the Way Nice Post and I like it Thanks

hessure - *January 19, 2014, 10:53 am*

thank you this is a great help, beautiful works.

CrypticX - *January 20, 2014, 1:49 pm*

Looks nice i'll give it a try thanks :D
