Thread: [Unregistered domain list! Get HQ domains + Niche ideas here](#)

**Punisher** - August 12, 2012, 1:50 pm

I'm no longer offering this service for free, to purchase, visit my fiverr link!

<http://fiverr.com/sickshot/come-up-with-and-find-5-domain-names-for-your-websitenicheproductidea>

Here's a list of some HQ unregistered domains as of 8-12-12

Note that none of these sites exist, and the descriptions are simply suggestions as to how they can be used successfully.

If you would like to register one of these domains, I suggest NameCheap

This took me quite a while to write, so please post a reply saying thanks!

**webdev77** - August 12, 2012, 8:52 pm

That's a decent list also, but you are right, the first list is better.

**Lysergic** - August 13, 2012, 6:43 am

There are some great domains on there for some decent projects, thanks for the list.

**Nitrox** - August 13, 2012, 7:00 am

Most of them are registered on 11th Aug and 12th Aug, a day before you shared them. :|

But thanks anyways for the list.

**MichaelPhelps** - August 13, 2012, 8:38 am

Keep it coming :D These are still fairly HQ and they give good niche ideas as well.

**rivalzone** - August 13, 2012, 4:10 pm

Yeah, you're late that's why. They're high dollar domains, I could have bought these and just sold them for twice what I paid and made a profit but instead I gave them away for free.

They were all available the minute I shared them.

I personally checked them all.
