Well my dad bought me a laptop yesterday please give me your thoughts on it. It is a Samsung series-7-notebook with a 15.6 in. screen and a 1TB hard drive.

It's nice, would've gone with a ibuypower or Asus laptop with a 3720M and a 650M.

yea those are nice but i just needed something for school, i'm getting into video editing and photography so i got this mostly for those purposes but it can still handle gaming if i want to play games.
