Well a while back ago I made this piece and it got me inspired to make this.

Old one:

Are those just renders pasted onto splatter brushes? Well even if so this is pretty good. I'm not sure if you could completely call it your creation but you pieced everything together very nicely and the colors and everything just look awesome on that white background. Good job.

The old one, it's actually much much better.

Loved it...

Ever went on this forum like 2-4months ago? cause thats when I've uploaded the first alrdy.

Baghead - August 15, 2012, 1:22 am

You made that in C4D? Well then good job, it's really good.

iDyxl - August 15, 2012, 1:39 am

They look good!

The best is the one with the red ball!

8/10

Can you provide a screenshot of the .PSD for the first one? You also said you posted it a few months ago, link please? Oh and might as well link me to this tutorial you apparently followed. I honestly don't believe you made that.

Alright, well you kinda took full credit for the first one even though you basically followed the tutorial to a T. Sorry for accusing you of ripping, but next time at least provide the tutorial you used.
