Thread: [\[PICK\] SKYPE RESOLVER! FREE \[MEDIAFIRE\] \[PICK\] \[FREE\]!](#)

Pick - August 14, 2012, 5:29 pm

Hey HF, I just created my first skype resolver, using my API. I decided to give it away for free. Heres the mediafire link... It was made in VB.NET

<http://www.mediafire.com/?es5r16wvrd07iu4>

Virus Scan from VirusTotal:

Thanks, and I hope you enjoy,

Also, if you put in a name, and it displays "Oops Cannot Find IP Address." Then, reopen the program, and it should work.

Thanks again.
