Thread: [\[TUT\] ? Simple Tutorial #4 ? Metallic Styles ?](#)

Bad Meets Evil - August 15, 2012, 12:32 am

[img]http://i.minus.com/irAxkH0iZYOIT.jpg[/img]

This tutorial was made 100% by me. Leave feedback and suggestions for further tutorials below :3

The Don Corleone - August 15, 2012, 2:04 am

Thank you very much for this tutorial.

General of the Army

Bad Meets Evil - August 15, 2012, 10:02 am

No problem. Post anymore questions you have and I will answer.

Shame - August 15, 2012, 10:36 am

Another nice one dude. I love the look of this, definitely gonna use this <3

The Don Corleone - August 15, 2012, 11:27 am

I was playing with lighting but when I add lighting the light is white (I can change the color I know) and the color around it is just black. I can't see where I can play with the opacity of the light or change the black color around the light. Can you please help me?

Bad Meets Evil - August 15, 2012, 1:09 pm

What version of Photoshop are you using?

The Don Corleone - August 15, 2012, 1:57 pm

Photoshop CS6 Extended.

General of the Army

Bad Meets Evil - August 15, 2012, 2:06 pm

When you are rendering lighting effects a menu will pop up on the right hand side. There you can change the intensity and many other settings. You can also drag around and resize the light with the circle/oval that shows up on the image. It will automatically preview the changes so you can see what the outcome will be.

The Don Corleone - August 15, 2012, 2:25 pm

Yeah I know that, I tried it a couple hours ago and it looked good but not what I wanted. It didn't really like HQ you know?

Yeah, I personally don't use the Lighting Effects filter but I am sure if you found the right settings it would look better. I don't use it enough to know what to suggest.

I use the soft brush the most time for light but I wanted to try it. Anyway thanks.

Perfect_Soul - August 15, 2012, 9:30 pm

Nice contribution once again in HF community. <3

I want signature tutorial of smudge :p

Bad Meets Evil - August 15, 2012, 9:44 pm

I appreciate it if you can do that BME ?

Bad Meets Evil - August 15, 2012, 10:45 pm

(Aug 15, 2012 10:17 PM)Perfect_Soul Wrote: [\[CITE\]](#) I appreciate it if you can do that BME ? I've got a few tags like this but they aren't so much smudging.

[img]<http://i.minus.com/izYECqXpSPiAv.png>[/img]

Perfect_Soul - August 15, 2012, 10:54 pm

It is okay if you post a tutorial for a noobs like me :p

Don't worry about the tag, it is not bad but not so good hehe

Bad Meets Evil - August 16, 2012, 1:43 am

My new tutorial is out on color schemes. Go check it out.

Zwift - August 20, 2012, 6:20 am

Quite a helpful tutorial. Thanks for posting BME. Appreciate it.

Okiyo - August 21, 2012, 3:13 am

I just went through your tutorials and they are all very well made and slick. Good job!

Bad Meets Evil - August 21, 2012, 11:17 am

Thanks Zagi. I am glad you like them.

theuninvited - August 23, 2012, 12:02 am

Okay, so this is off-topic, but I was trying to make some really nice 3d text in c4d. How would I do that+ add a nice texture to it?

Bad Meets Evil - August 23, 2012, 12:11 am

C4D is a whole other game. Go look at some of the C4D video tutorials on the forum.

theuninvited - August 23, 2012, 12:26 am

Ah alright, thanks anyway. Fantastic tutorials, very HQ. :)

Bad Meets Evil - August 24, 2012, 1:26 pm

(Aug 23, 2012 12:26 AM)Crun?hy Wrote: [\[CITE\]](#) Ah alright, thanks anyway. Fantastic tutorials, very HQ. :)

Thanks Crunchy. More coming out soon.

CR8IVE - August 24, 2012, 2:45 pm

Thanks for the tutorials, they're great! been reading them to expand my skills instead of focusing on c4d.

131 - August 24, 2012, 5:19 pm

Thank you very much for this, I just need to find where I saved Photoshop so I can try this out now...

Crowny - August 24, 2012, 5:33 pm

So simple, yet so damn great.

Thank's for sharing brotha!

kemronkelin - August 26, 2012, 10:09 pm

I have no gradients like this ,
could i use another gradient?
More over light is not matching,I wanna use curves.

Bad Meets Evil - August 26, 2012, 10:53 pm

You don't need to have a gradient... you make the gradient.

sokifilou - August 27, 2012, 12:10 pm

simple and look great. Thank you very much :)

? Various ? - August 29, 2012, 7:26 am

this is a nice brushed aluminum look :D like the band around the iphone 4 and 4s, very nice!

All-Time - August 30, 2012, 6:07 am

Thanks you very much for this tutorial

saywa - August 30, 2012, 7:33 am

Thank you very much for this tutorial. I might use this :)

MagicMushroom™ - September 1, 2012, 7:43 am

Looks good...will try this later ;)

Bad Meets Evil - September 5, 2012, 12:22 pm

Glad that you guys all enjoyed the tutorials.

Bad Meets Evil - September 10, 2012, 7:58 pm

Come and get your metallic styles here boize.

shvan99 - September 10, 2012, 9:29 pm

Thank you very much for this tutorial.

DESTRUCTO - *September 11, 2012, 9:42 pm*

Nice tutorial bro keep up the good work :D

hmzh4 - *September 15, 2012, 10:56 am*

Wow great effect

I love metallic style,

Thank you for this tutorial

Bad Meets Evil - *October 20, 2012, 7:27 pm*

This tutorial needs some more love.

Bad Meets Evil - *November 11, 2012, 1:16 am*

At the bottom of the list of my tutorials so decided I would it back up for you guys to see.

kaiyokoon - *November 12, 2012, 4:54 pm*

Nice tutorial, this should go nicely with the engraved text tutorial :D

MUT4NT - *November 14, 2012, 12:57 am*

Nice! Thank you very much for this tutorial.

Bad Meets Evil - *January 2, 2013, 12:22 pm*

No problem Mutant. Post your results guys.

Microwave - *June 21, 2013, 4:38 am*

Amazing! I used this for a mate's flash game menu screen.

23oscar23 - *October 25, 2013, 2:55 pm*

Nice verry good metal It looks verry legit :)
