Thread: [\[Group Idea\] Web Dev \[Group Idea\]](#)

M0D3M - August 15, 2012, 2:26 am

Hello,

I have had this idea for awhile now, and I believe that a group like this is crucial, especially now that Coders is gone. Basically, the group would be for web developers. It would be for the discussion of web development, and we would post tutorials in regard to the subject. We would also appoint "Teachers" in which HF members could pay a fee, and the Teacher could give them lessons in a certain language.

I am looking for people that would be interested in this as much as I am. I have money to put into it, but not quite enough, if you donate a large amount towards the group, you will be appointed leadership when the group is created.

Interested? Have questions? Add me on Skype. My Skype name is in my signature.

YES!

HALLELUJAH!

AMEN TO THIS SIR!

i would have paid completely for this group if i wasnt taking losses now.

PLease do this.I'll be an active member with concept development

I think Eminence could take something like this on, I could put the idea forward and see if anybody likes it if enough people are keen to see it happen.

This would be awesome! I have been looking for something to do with my web developing skills, just haven't found anything. I would love to be a part of this if it gets started up!

Eminence includes web mastering, which is the same thing.
