Guys, here's the method.

The screenshot doesn't show confirmation:

It's grand total, fucking dumbass.

And it's the Discover exploit.

Use a Discover Prepaid Card with no balance, click order. Get an error. Click order again

>Confirmation

This is patched, unless your showing teamviewer proof, there's only one working exploit, found by

me.

Close this before you get embarrassed even more.

OP your a huge faggot. Even taking proof, then making a thread buying a Discover Prepaid.

DooMz. - August 16, 2012, 5:46 pm

yes he was charging that much and he sold it to me cheap thats cause he knew that it was no longer working

Crumble - August 16, 2012, 5:49 pm

Then why we're you selling my no longer working method?

The day after I found this, abused it, called them up and told them about it, it got patched.

Only one working method, me and Juicy know. Kids, kids these days.

Revenge, count on it.

DooMz. - August 16, 2012, 5:50 pm

im sorry man you have skype i can talk to you more

Crumble - August 16, 2012, 5:51 pm

No, talk is over. You knew my method wasn't working, and you snitch.

Enough talking with you.

DooMz. - August 16, 2012, 5:53 pm

i had no clue you method wasnt working i was under the inpresion that it was since japan said that it was working and said he bought me pizza with that method

Crumble - August 16, 2012, 5:55 pm

Fuck both of you.

Why did you also fake pizza order proof? That's not even the confirmation, Imfao.

DooMz. - August 16, 2012, 5:57 pm
