Thread: [\[FREE\] Photoshop Layer Style Pack \(1000+\)](#)

slimed - August 17, 2012, 5:44 pm

DOWNLOAD: <http://www.sendspace.com/file/xncfsx>only .asl files

intended for photoshop

around ~1.1k styles in total

47.3MB

I probably rely on layer styles a bit too much myself, and I've collected quite a few from several different websites. I personally appreciate resource sharing so I've decided that I would share some of my favorite and most used styles - ranging from simple to not so simple. I take no credit for any of these styles, I'm sure I got most of these from dA.

hope you enjoy! :~)

Mr. Nick - August 17, 2012, 5:45 pm

I'd like a copy of this, thanks in advance.

Muise - August 17, 2012, 5:46 pm

Hey could I get this? Thanks in advance! Also did you make any of these yourself? Or all just off the internet?

Legend Boy - August 17, 2012, 6:01 pm

Can I have these please?

Thanks in advance.

slimed - August 17, 2012, 8:04 pm

PM'd everyone.

edit:

i just clicked the link and there was a weird download page with a fake button, then i refreshed and the real download page appeared.

this is what the real download link looks like so refresh the URL if the page doesn't have this:

Why's the file an .exe? Never heard of that...

Edit: Scan of the file:

5/42there's no virus. i just stated in my last post to refresh the page if you don't get a download button like the one in the screenshot i provided, i'm not sure why the fake button was appearing. sorry about that misunderstanding, i'll upload to a different host and have a mod edit the op tomorrow if possible.

it's not an exe:

it's not an exe:

You're lying. It was a 300kb .exe file (RAT).
It was also crypted. (not fud anymore xD)

there is a fake download button and a real download button, you'll understand if you take roughly 10 seconds to read my last two posts.

I downloaded the original link before you replaced it, dumbass.

and plus people thanked me via PM after downloading the .zip.

i can't believe i'm even defending myself to obvious stupidity on your part.

yesterday. Thanks for the post!exactly, thank you.

i honestly had no ill intentions with this, i merely wanted to share my photoshop styles. i decided to screencap the entire thread as it is now just for clarification purposes: [page 1](#) [page 2](#)

i PM'd someone to edit the download link on the first page (which is infected by no means. the file sharing host must naturally have a "fake" download button before refreshing to the "real" download).

Amped- - August 21, 2012, 7:04 pm

When I click on the link I get nothing :\ just a really quick pop up then it goes away.

TryingToHack - August 22, 2012, 2:45 pm

Thanks, awesome job dude.

Lol the link is just working perfectly with me. And no viruses.

Thanks.
