Requirements:

[FireFox](#)

[Mozrepl](#) (addon for FireFox)

(optional) an [Virtual Machine](#)

Screenshot: [img]http://image-upload.de/image/1pjoGT/7c5e0a48a0.jpg[/img]

[Download](#)

[VirusTotal 0 / 42](#)

If you test it please tell me if it works or not !! (just pm or reply)

Info:

This bot is programmed in java so many many machines can use the bot.

This Bot is programmed to click network links and your own links.

If more people use this Bot, you get more money !!

The firefox window dont have to be in front of the Screen ONLY opened.

If you dont use a virtual machine its the best if you run the bot and use another browser to surf in the internet.

known Bugs:

1. If you change firefox windows the bot connect to the opened window and use this for clicking.

sry for my bad english but i hope you enjoy and use the bot. :)

You made sure you added referrers to the links right? So that not all of them originate from the same place and perhaps come from google or a blog site perhaps. If you did not do this then your links could easily be flagged in an audit.

JoahTheron - August 19, 2012, 2:42 am

i dont added refferers to the links. if you mean that your adfocus account can be banned, thats not true because i click my own links over 2 days right now and i see no problem.

how much have you earned so far from this bot?

JoahTheron - August 19, 2012, 7:23 am

if i click solo without any network i get about 1 \$ per day. thats nothing thats why i have added network links.
