Try that. Idk why you couldn't see it, I could.

Phytrix - August 18, 2012, 6:22 pm

That's pretty funny, and yet so true :)

Mine is more like:

"Fuck this, google"

"Fuck this, oracle"

"Fuck this, TF2"

Actually it's not true. People who can code properly don't have any problems as long as they know what they are doing.

This picture refers more to HF skids who c&p code and try to run it without checking if the code is depending on something else..

.. or people who can't code at all.
