Thread: [\[TUT\] Removing objects from images \(Photoshop\)](#)

**slimed** - August 18, 2012, 7:10 pm

So, I've decided to make a second tutorial. This is a pretty useful photoshop feature and it's quick and easy to do in only a couple steps. As I stated in the last frame, certain images might be a little pesky to work with, this is just a random example and the object is rather small with a simple background so it wasn't tedious. Sometimes you'll be able to easily remove large objects from the foreground, and other times it'll take a bit of work to remove small objects from the background, it varies from image to image.

I hope this could help! :~)

Feel free to leave questions, I'll be sure to get around to answering them, feedback is always appreciated as well.

**Zabibaaa** - August 18, 2012, 10:23 pm

Please fix the image! It's broken mate!

**slimed** - August 18, 2012, 10:52 pm

really? it's not for me - i'll change the image host. for some reason imgur was removing the transparency from it so i used a random image host.

edit: is it still broken now?

**asifraj** - August 19, 2012, 1:41 pm

Very nice tut mate.. Keep sharing.. :)?

**Patryk.** - August 19, 2012, 3:44 pm

Interesting tutorial very simple and easy! :)

-Patryk

**slimed** - August 20, 2012, 10:29 pm

thank you! i appreciate the feedback.

**The Don Corleone** - August 21, 2012, 1:11 pm

I tried it with a picture from Google and it worked! After that I made a picture by myself and it worked again! Thanks.

General of the Army

**iwu** - August 21, 2012, 9:19 pm

Interesting tutorial.

Thanks for the share, will be sure to try it out soon!

**Novica** - August 22, 2012, 3:37 am

Great tutorial, good job.

Keep up with good tutorials.

**DeathEater** - August 22, 2012, 11:49 am

WOW amazing TUT ill be using this in the future, thanks a lot

**zetza** - August 23, 2012, 10:53 am

Thanks alot!

I need this for a school project, maybe it'll become usefull someday.

**bdgr** - August 23, 2012, 3:05 pm

:( my photoshop dosen't have content aware.. this is the only feature's available..

**Artifice79** - September 10, 2012, 12:29 pm

Thanks for this, great share!

Will definitley be using this in the future.

**Martin Luther King** - September 11, 2012, 8:56 am

Ive always wanted to know how to do that, thank's man.

Its only for CS5+

You should Add this in the first post that this only works for CS5 and CS6

**DESTRUCTO** - September 11, 2012, 9:35 pm

I think this would be good for whats missing ? photos

**hotcococharlie** - April 8, 2014, 2:40 pm

very nice tut will help a lot thanks.

**wareospike** - April 9, 2014, 3:03 pm

Thanks man! Awesome tut! Really great!
